

MATEMATIKA

Kelas 3 SD

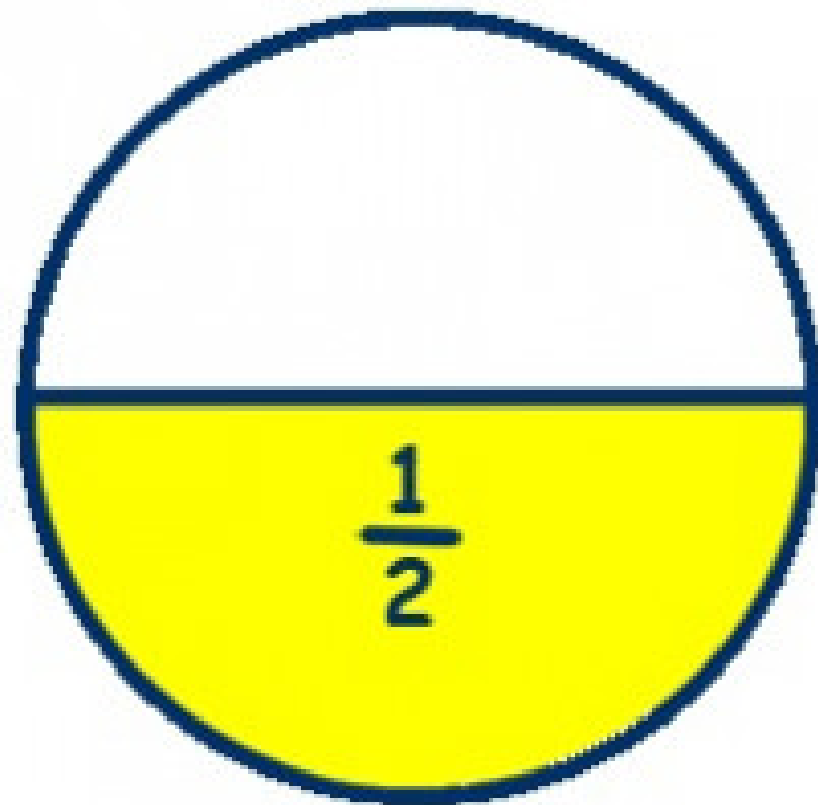

Pecahan

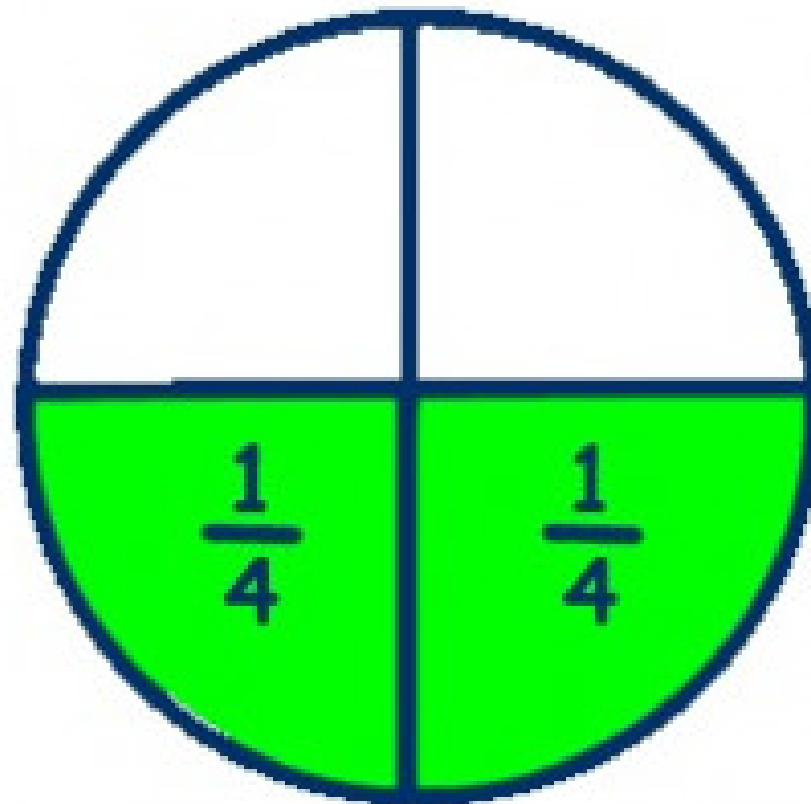

Pecahan

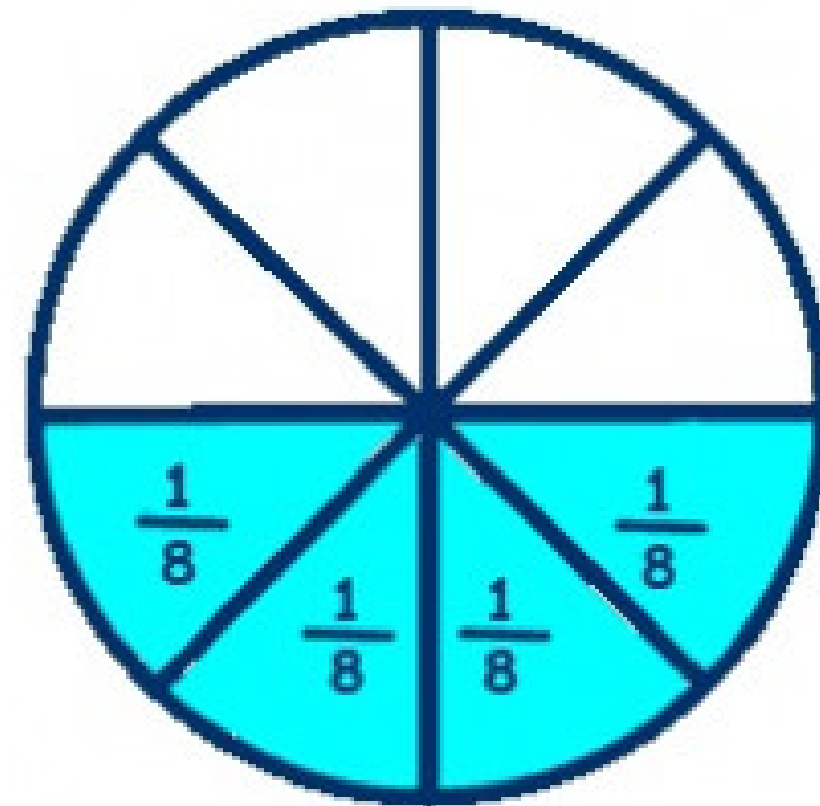

Pecahan adalah bilangan yang menunjukkan bagian dari suatu keseluruhan

$\frac{1}{2}$

$\frac{2}{4}$

$\frac{4}{8}$

Pecahan

Cara membaca

1 → Pembilang

2 → Penyebut

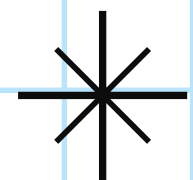

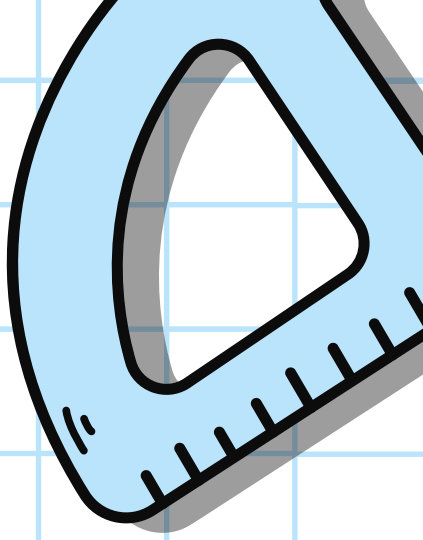

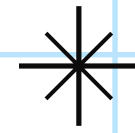

Contoh:

$\frac{5}{4}$ = 5 **Pembilang**, 4 **Penyebut**

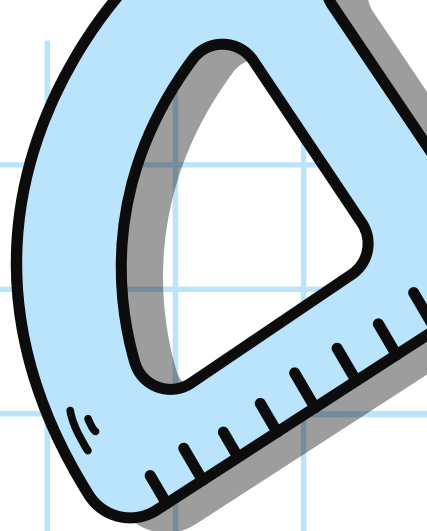

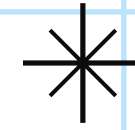

$\frac{6}{8}$ = 6 **Pembilang**, 8 **Penyebut**

$\frac{9}{5}$ Dibaca : sembilan per lima

$\frac{3}{7}$ Dibaca : tiga per tujuh

Pecahan

Latihan:

$$\frac{1}{5} = \dots \text{ Pembilang, } \dots \text{ Penyebut}$$

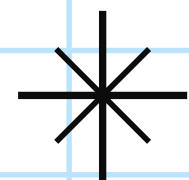

$$\frac{9}{2} = \dots \text{ Pembilang, } \dots \text{ Penyebut}$$

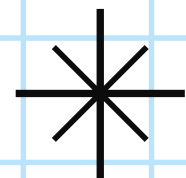

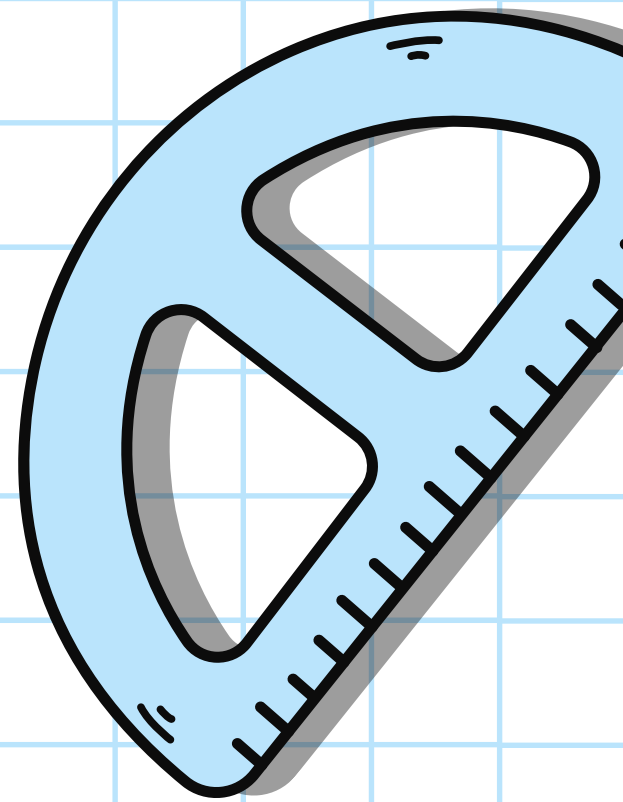

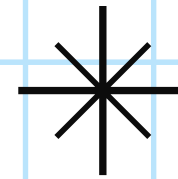

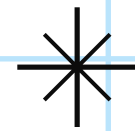

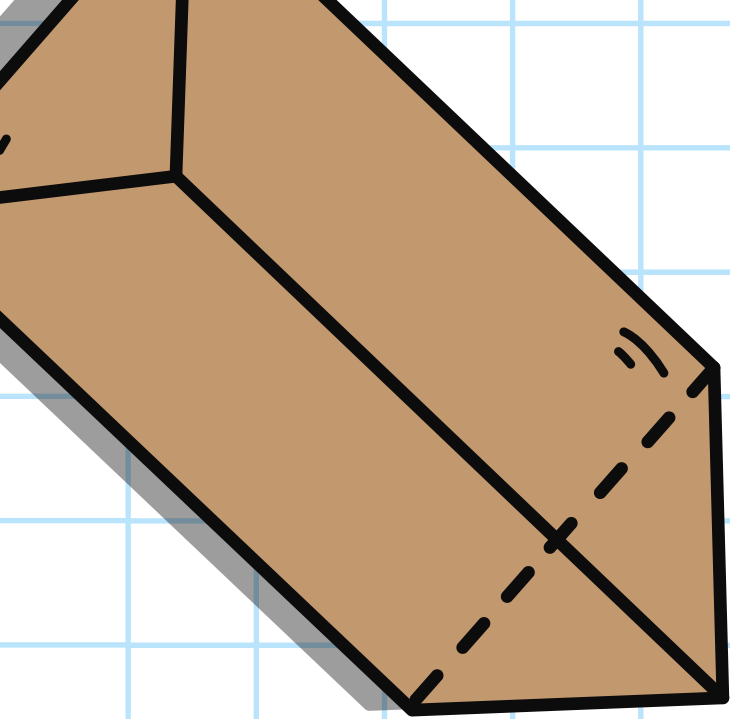

$$\frac{12}{3} = \dots \text{ Pembilang, } \dots \text{ Penyebut}$$

$$\frac{4}{3} \text{ dibaca } \dots$$

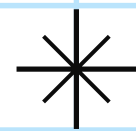

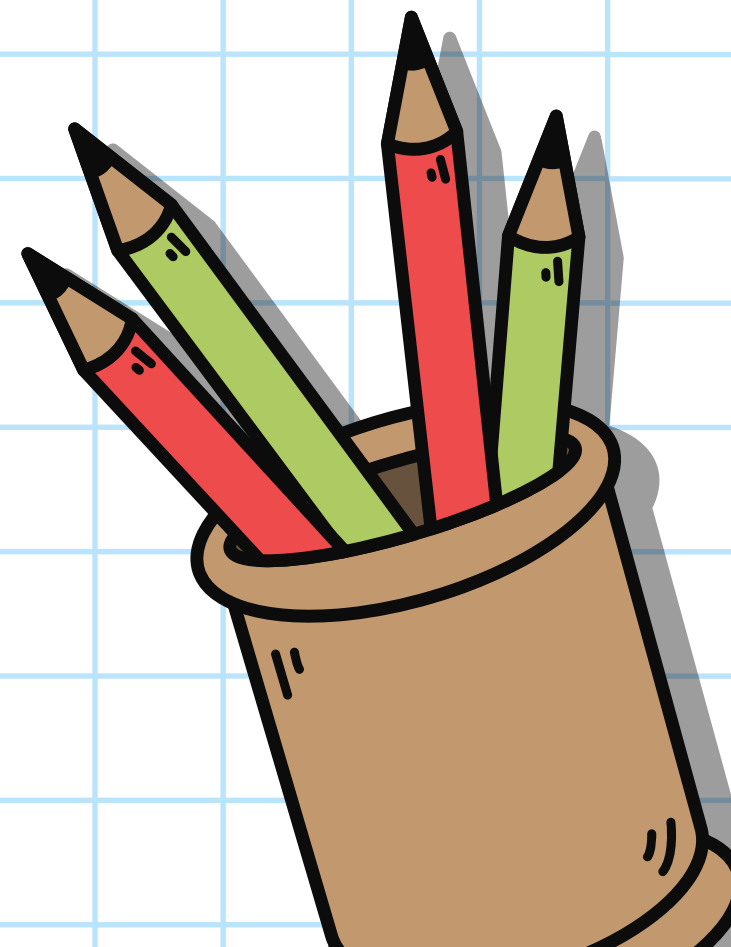

$$\frac{15}{5} \text{ dibaca } \dots$$

$$\frac{21}{14} \text{ dibaca } \dots$$

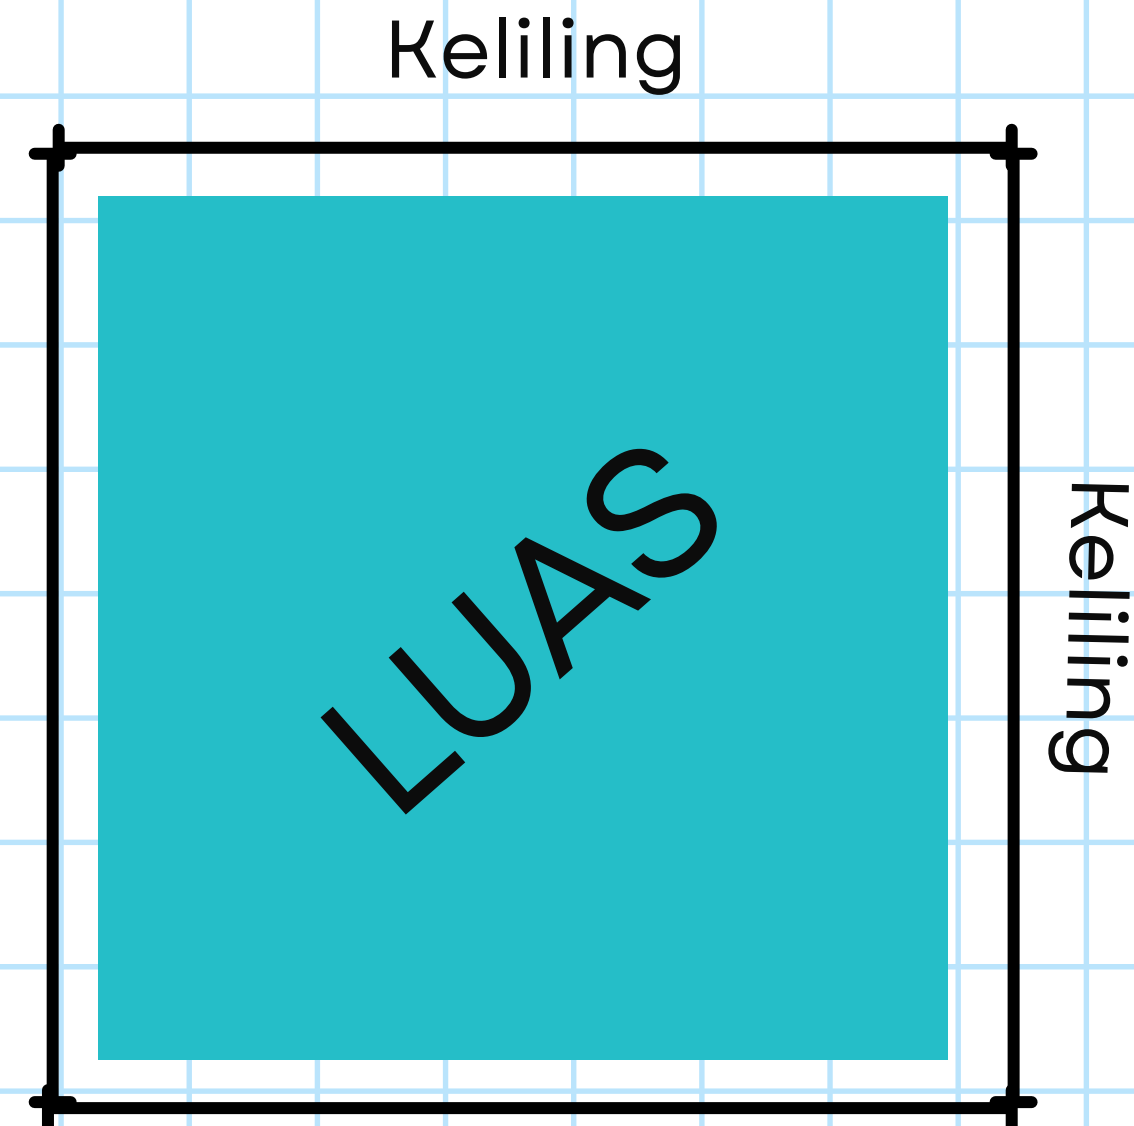

Luas & Keliling

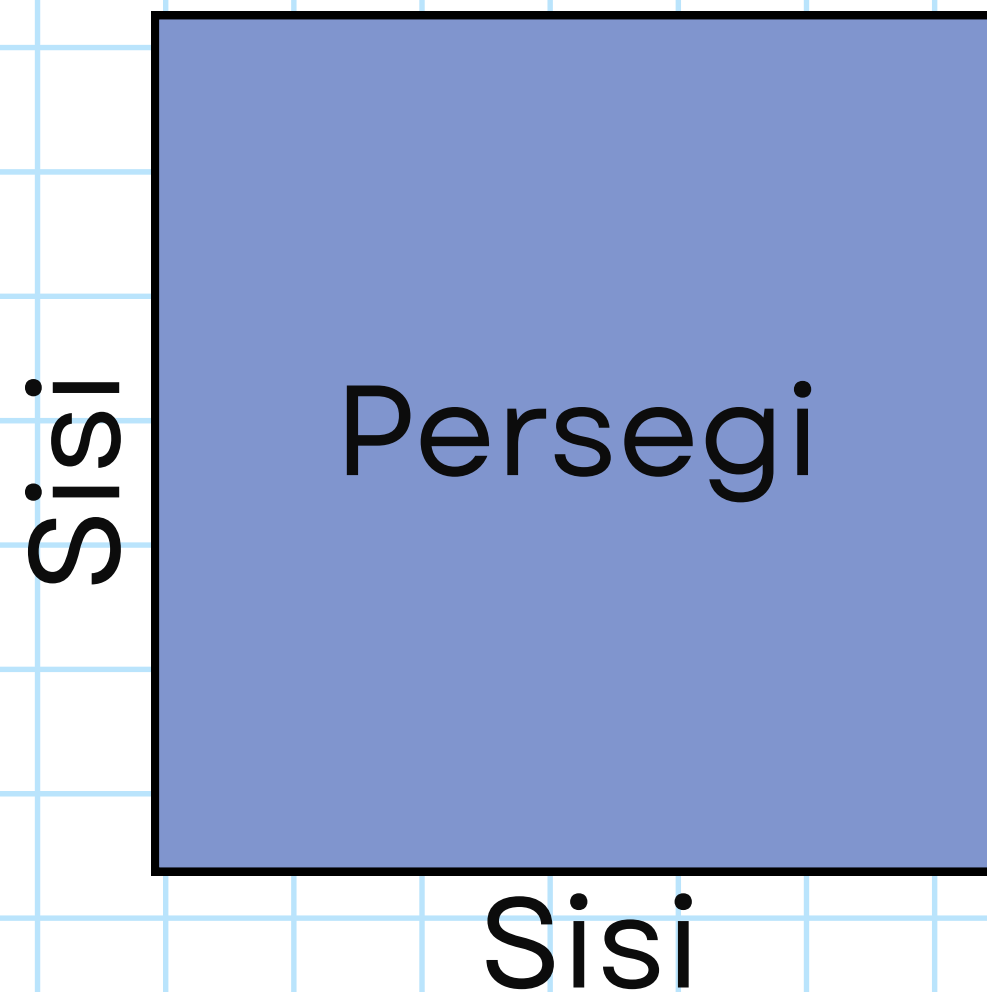

Luas & Keliling

Luas bangun datar adalah ukuran besar kecilnya permukaan suatu bangun.
Keliling bangun datar adalah panjang seluruh sisi pada suatu bangun

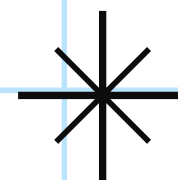

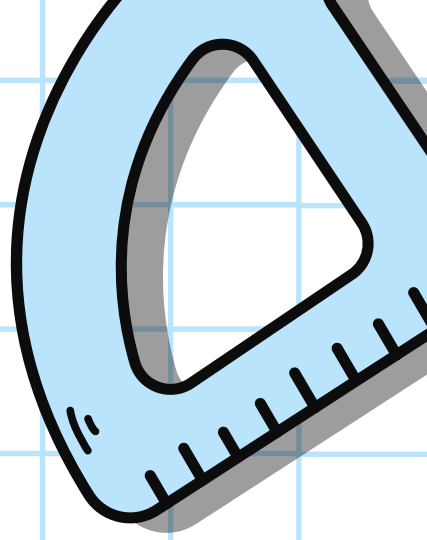

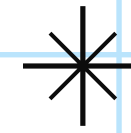

Luas & Keliling

Rumus luas dan keliling

Luas : Sisi x Sisi

Keliling : $4 \times \text{Sisi}$
: Sisi + Sisi + Sisi + Sisi

Luas & Keliling

Rumus luas dan keliling

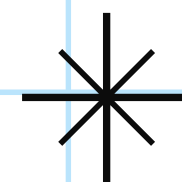

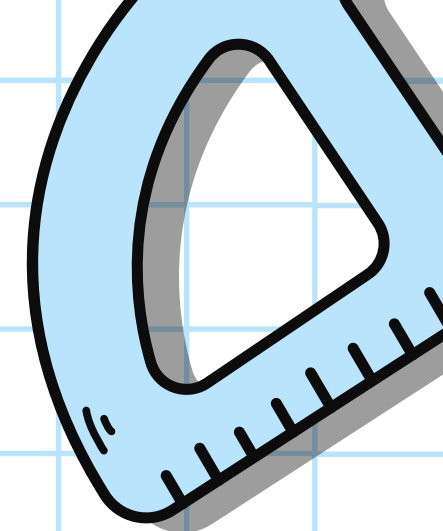

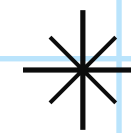

Panjang

Lebar

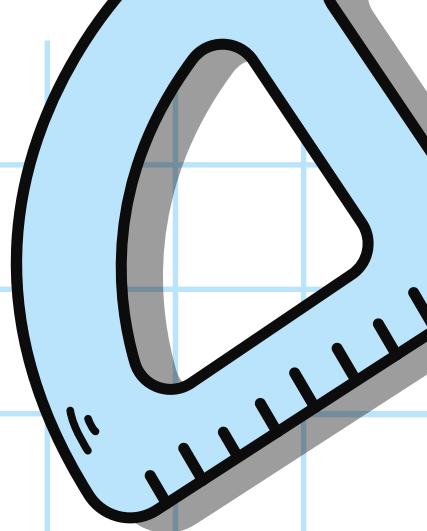

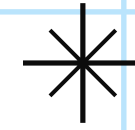

Persegi Panjang

Luas : Panjang x Lebar

Keliling : $2 \times (\text{Panjang} + \text{Lebar})$

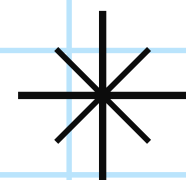

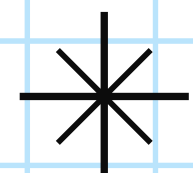

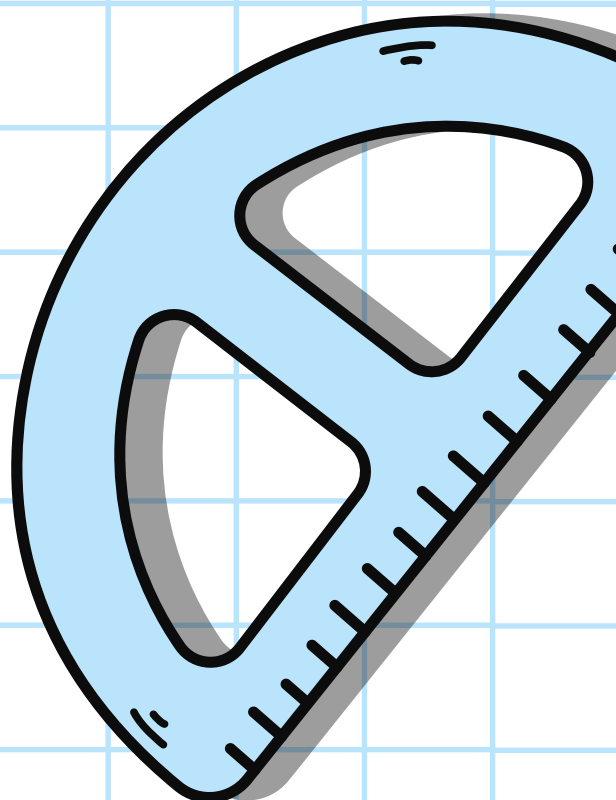

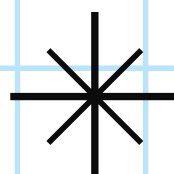

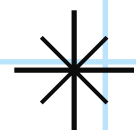

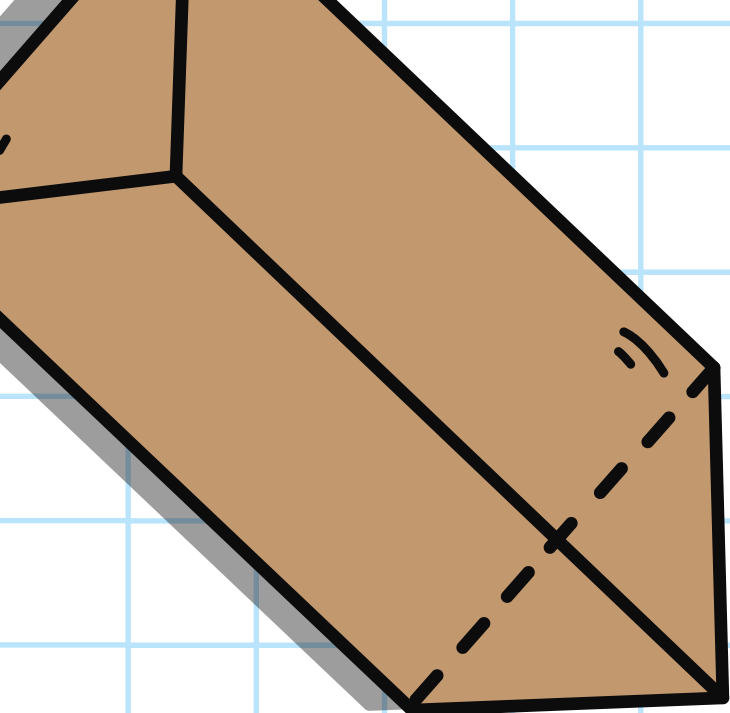

Luas & Keliling

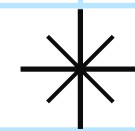

Latihan:

- Keliling persegi yang memiliki sisi 4 cm adalah
- Keliling persegi panjang yang memiliki panjang 7 cm dan lebar 4 cm adalah ...
- Luas persegi yang memiliki sisi 6 cm adalah
- Luas persegi panjang yang memiliki panjang 8 cm dan lebar 3 cm adalah

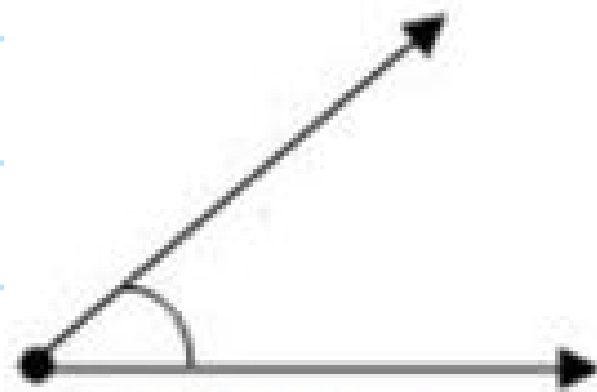

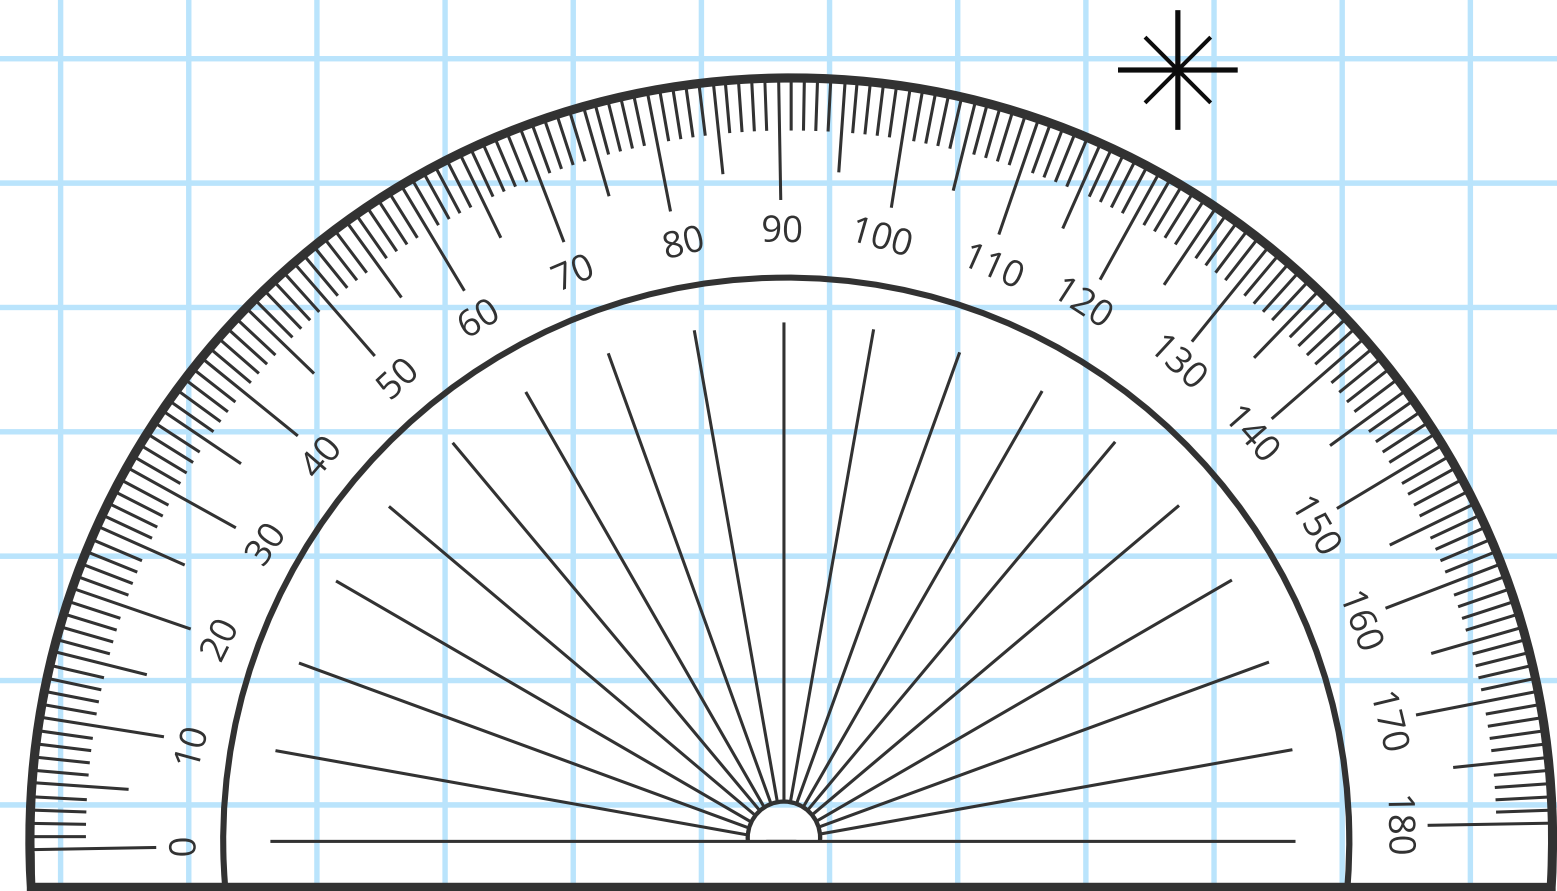

Sudut

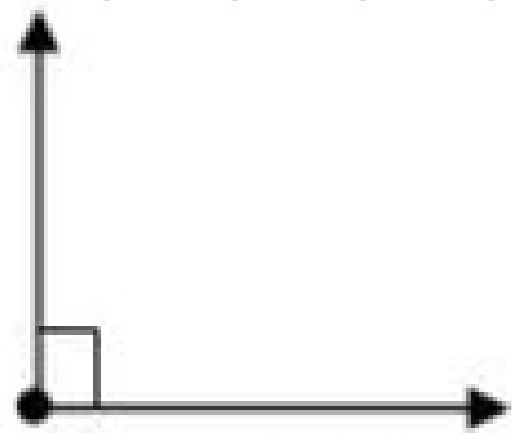

Sudut

Sudut adalah pertemuan dua garis yang membentuk bukaan tertentu. Ukuran bukaan/sudut tersebut bisa diukur dengan alat busur derajat

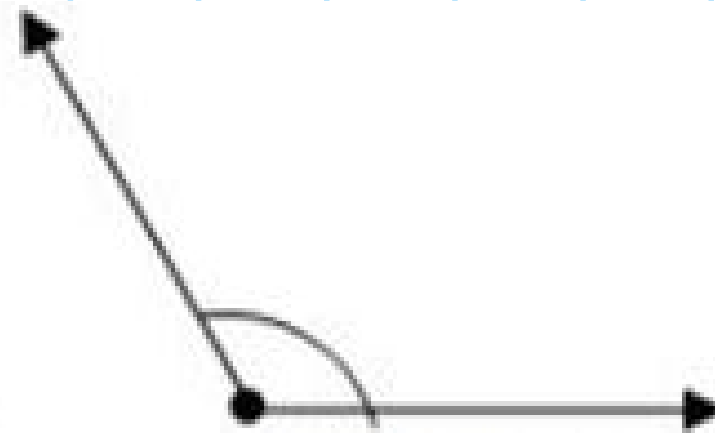

Sudut lancip

Antara 0° dan 90°

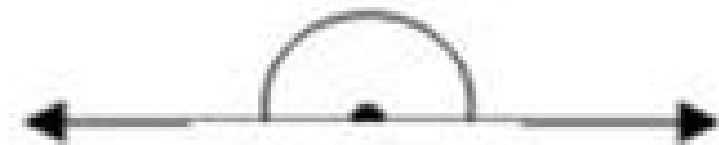

Sudut siku-siku

Tepat 90°

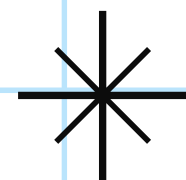

Sudut tumpul

Antara 90° dan 180°

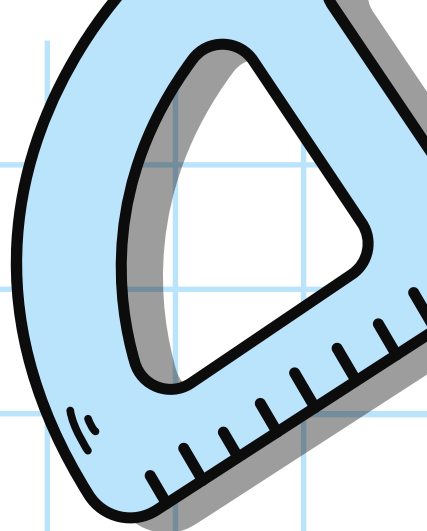

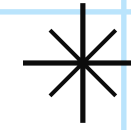

Sudut lurus

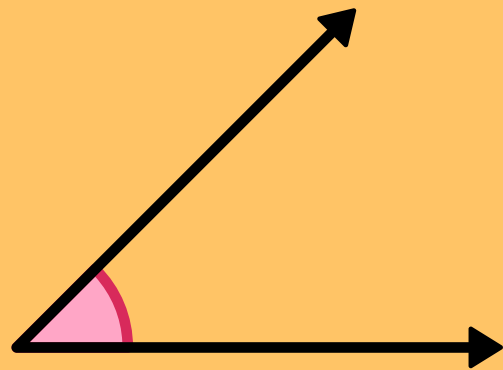

tepat 180°

Sudut

Latihan:

Sudut tersebut merupakan sudut

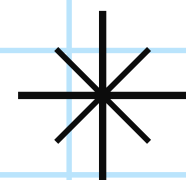

Sudut 90° tersebut merupakan sudut

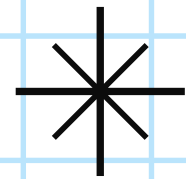

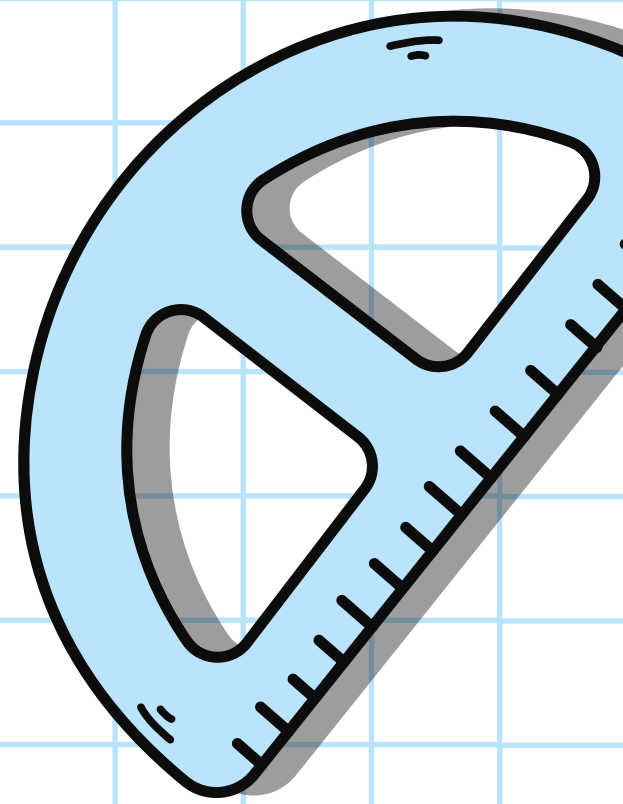

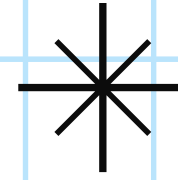

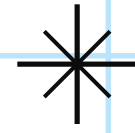

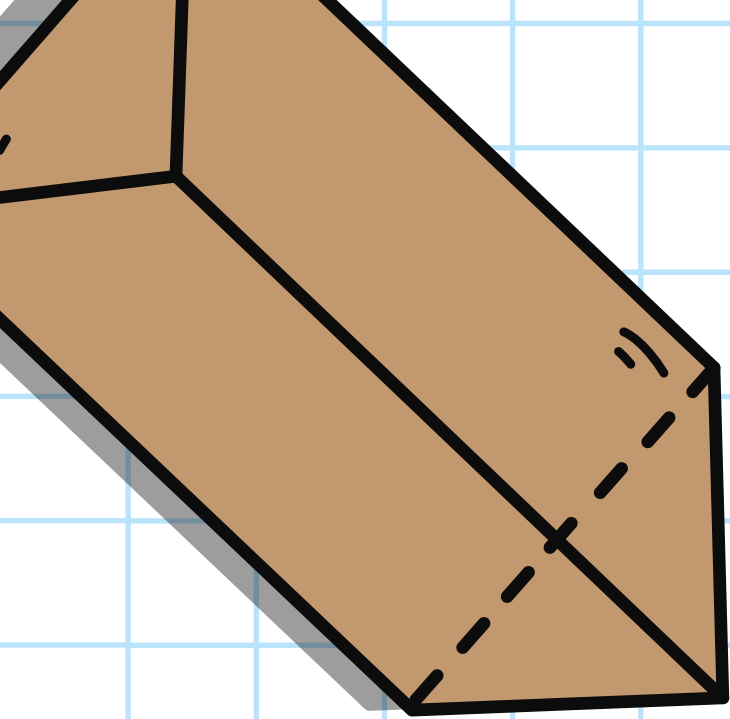

Sudut 10° tersebut merupakan sudut

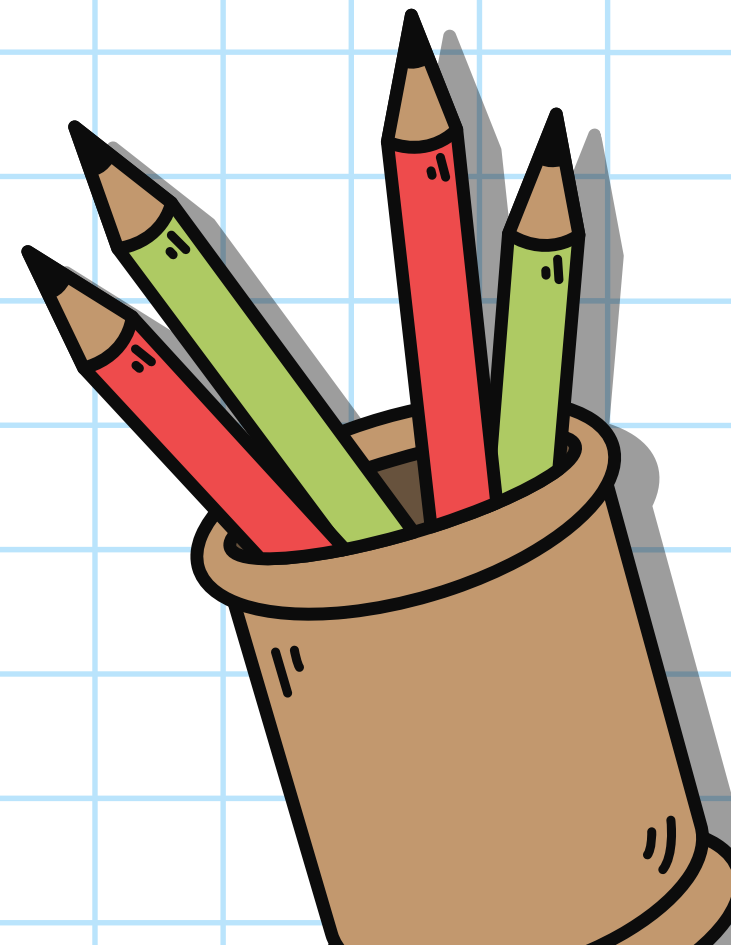

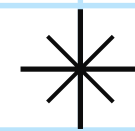

Sudut tersebut merupakan sudut

Sudut 165° tersebut merupakan sudut

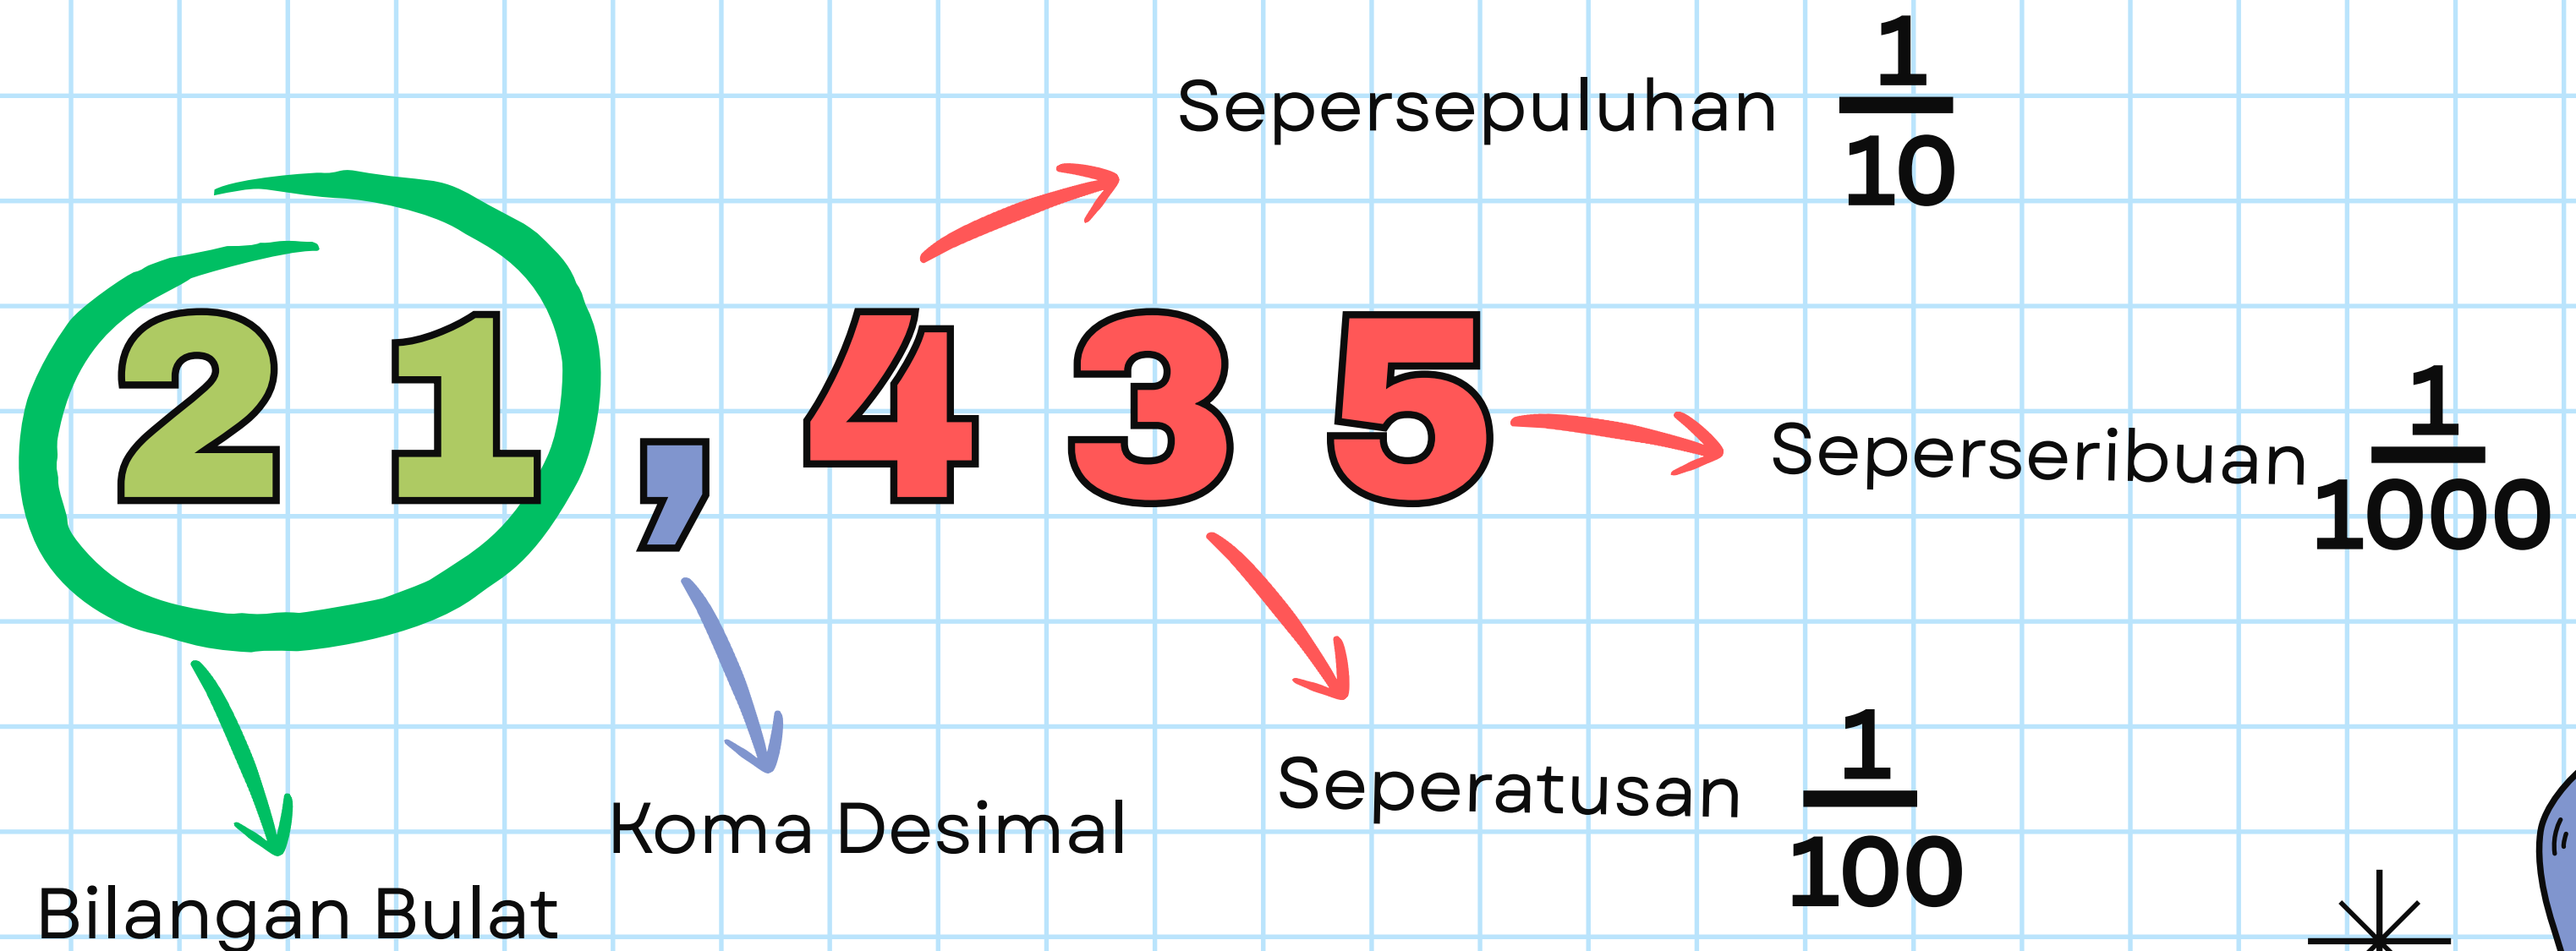

Decimal

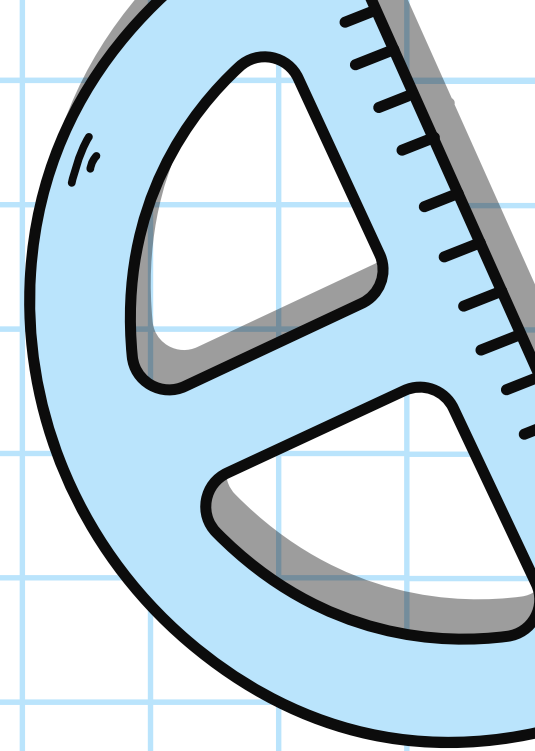

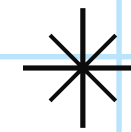

Desimal

Desimal adalah bilangan pecahan yang ditulis dengan tanda koma untuk menunjukkan bagian dari satuan

Desimal

Pembulatan

Untuk angka ≥ 5 , dibulatkan ke **atas**.

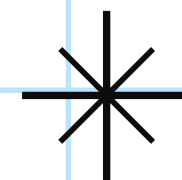

Contohnya:

- 0,436 dibulatkan menjadi 0,44
- 0,215 dibulatkan menjadi 0,22
- 0,666 dibulatkan menjadi 0,67

Untuk angka < 5 , dibulatkan **tetap** pada bilangan itu.

Contohnya:

- 0,432 dibulatkan menjadi 0,43
- 0,284 dibulatkan menjadi 0,28
- 0,333 dibulatkan menjadi 0,33

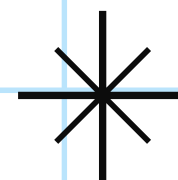

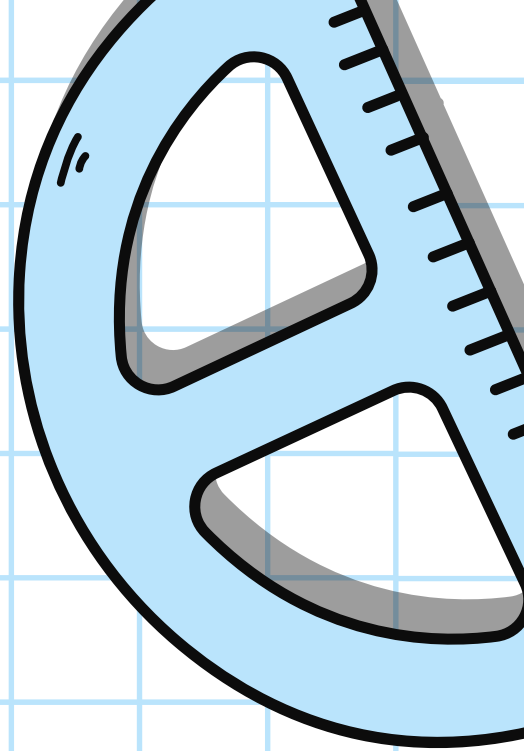

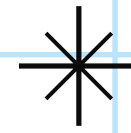

Desimal

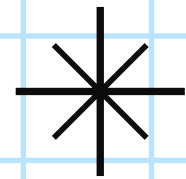

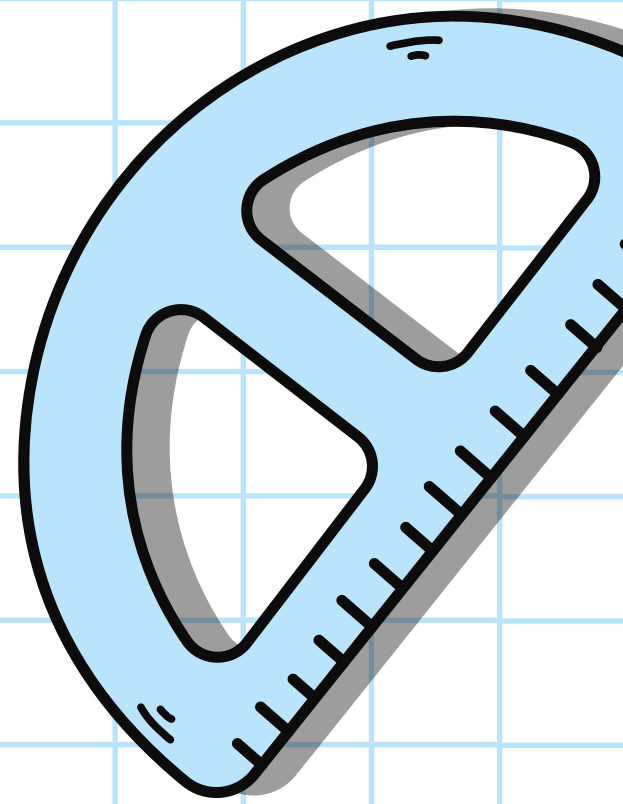

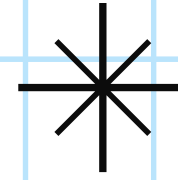

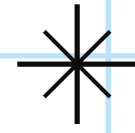

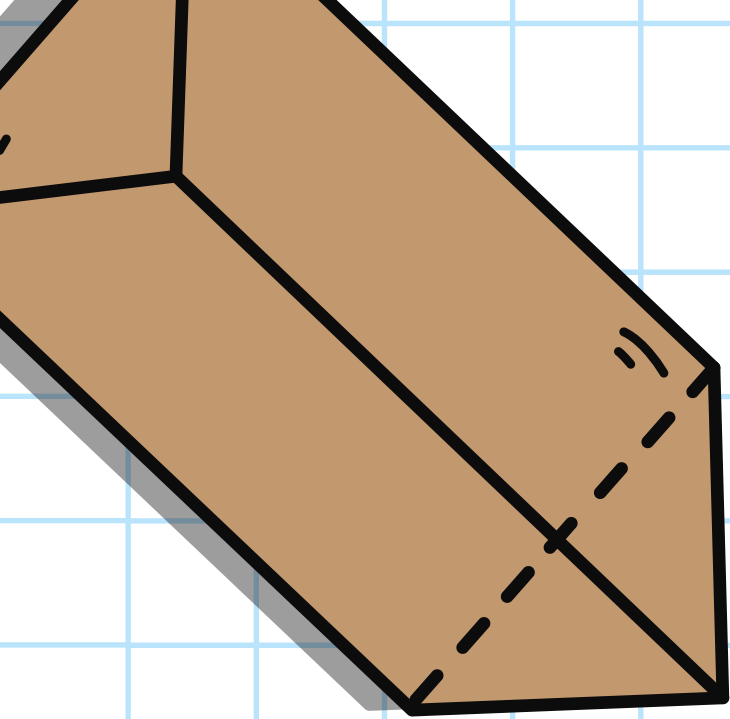

Mengubah Desimal ke Pecahan

$$2,5 = \frac{25}{10} = \frac{5}{2}$$

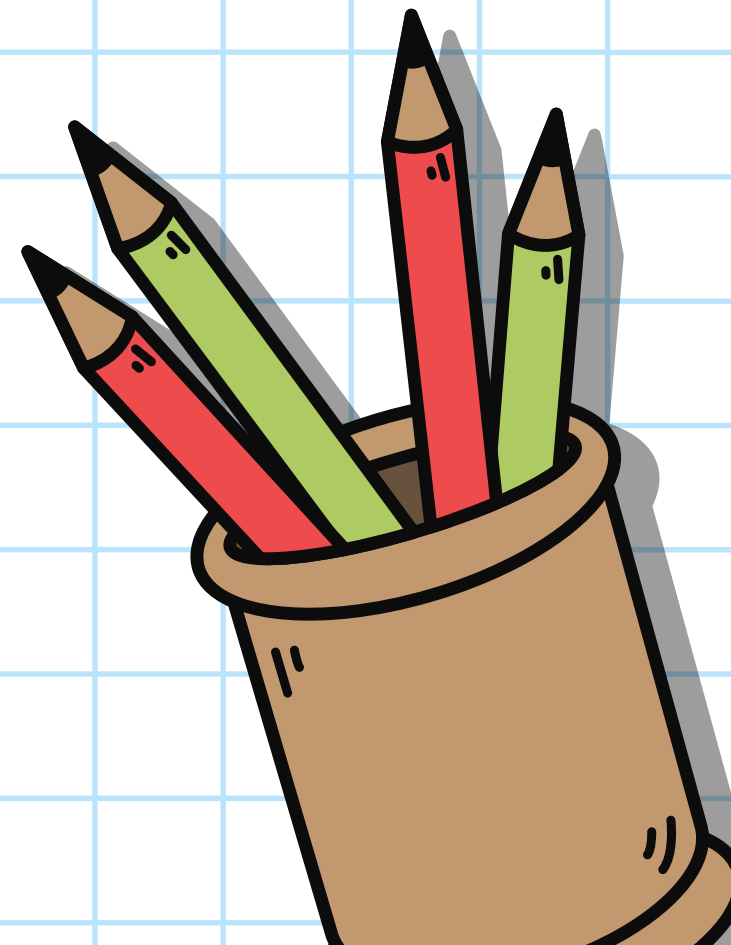

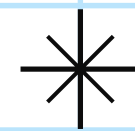

$$1,25 = \frac{125}{100} = \frac{5}{4}$$

$$0,375 = \frac{375}{1000} = \frac{5}{2}$$

Persen

Persen

Mengubah Persen ke pecahan dan sebaliknya

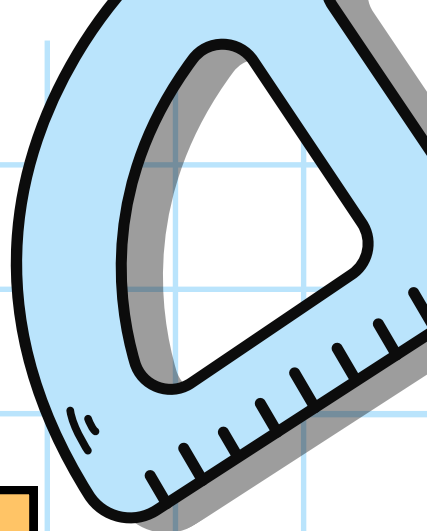

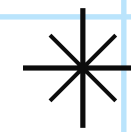

Persen adalah bilangan pecahan yang menunjukkan bagian **dari seratus** dan ditulis dengan tanda %

Contoh:

$$* \quad 20\% \quad \rightarrow \quad \frac{20}{100} \quad \rightarrow \quad \frac{1}{5}$$

$$* \quad \frac{3}{4} \quad \rightarrow \quad \frac{75}{100} \quad \rightarrow \quad 75\%$$

Desimal & Persen

Latihan:

1,357 dapat dibulatkan
menjadi....

3,542 dapat dibulatkan
menjadi....

$\frac{68}{10}$ diubah menjadi desimal
menjadi....

$\frac{23}{50}$ diubah menjadi desimal
menjadi....

40% diubah menjadi pecahan
menjadi....

$\frac{20}{10}$ diubah menjadi persen
menjadi....

60% diubah menjadi **desimal**
menjadi....
