

MATEMATIKA

Kelas 4 SD

$$a^2 + b^2 = c^2$$

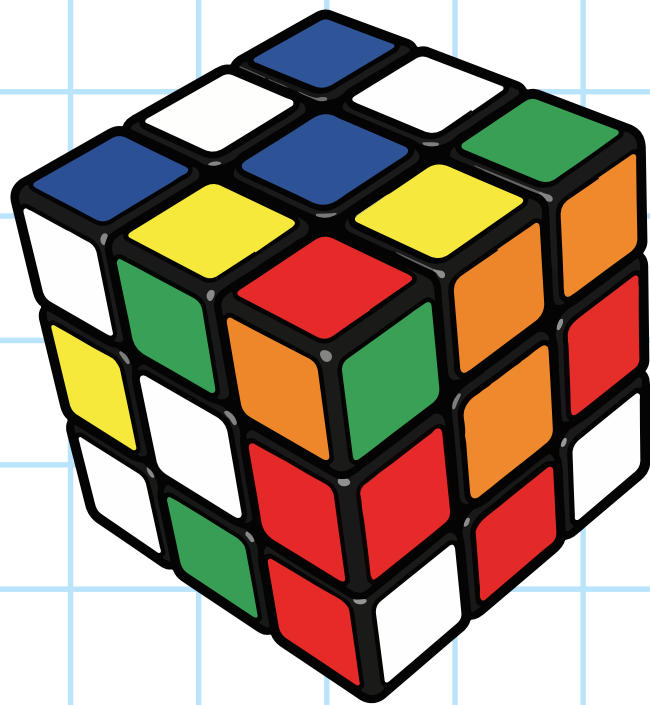

Bangun Ruang

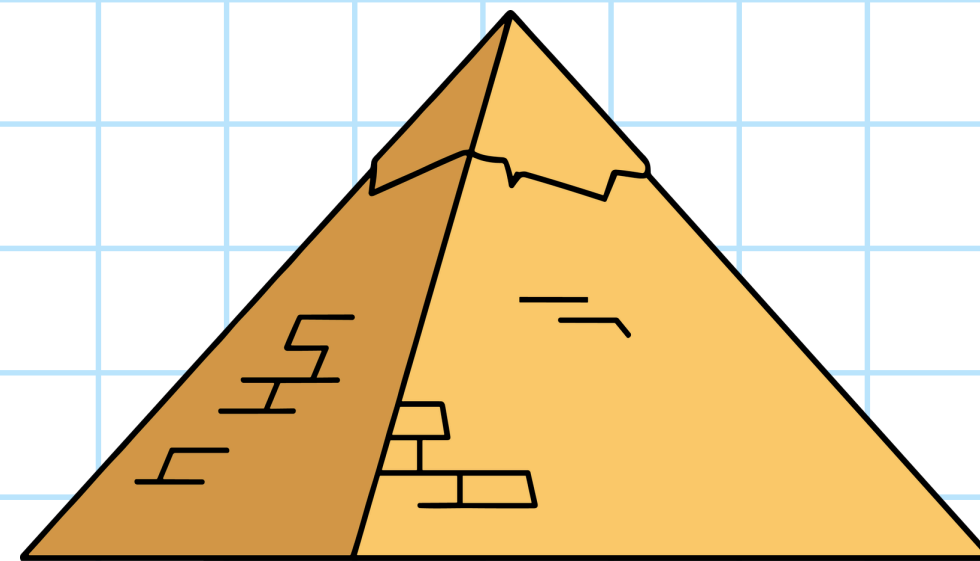

Bangun Ruang

Bangun ruang adalah bentuk tiga dimensi yang memiliki panjang, lebar, dan tinggi, menempati ruang, memiliki volume dan luas permukaan, serta dapat dilihat dari berbagai sisi

Contoh:

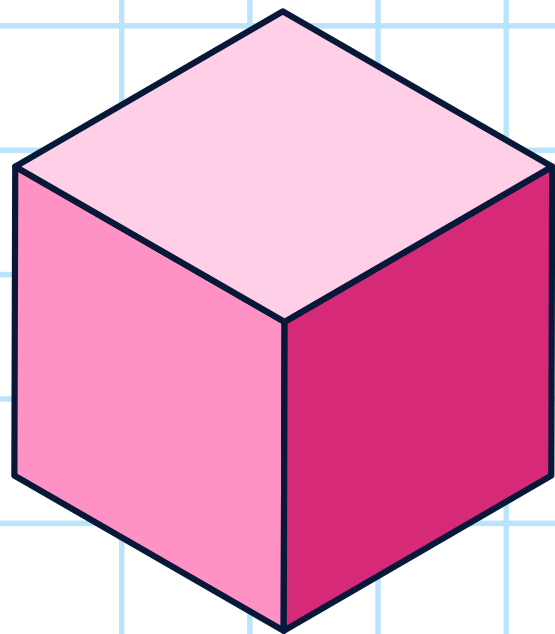

Rubik ini memiliki bentuk **Kubus**

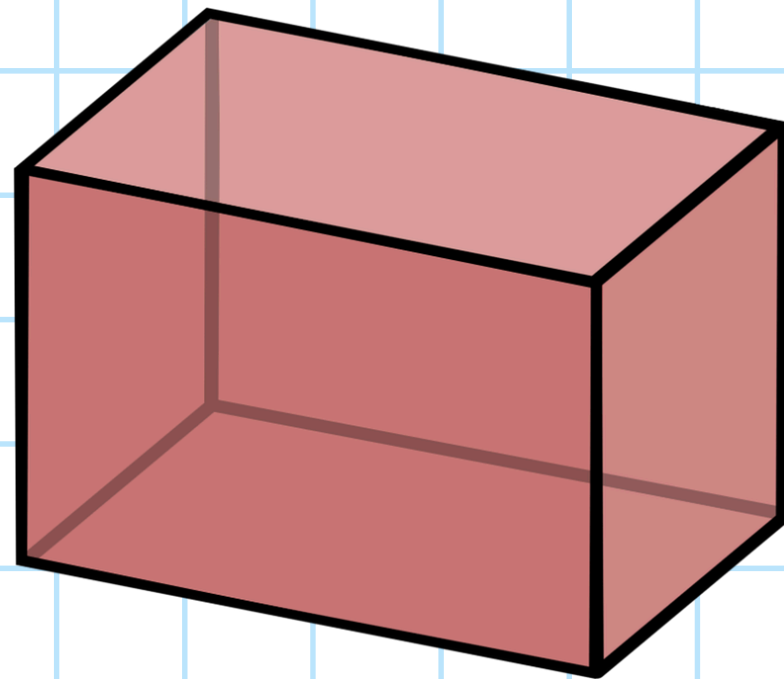

Piramid ini memiliki bentuk **Limas**

Bangun Ruang

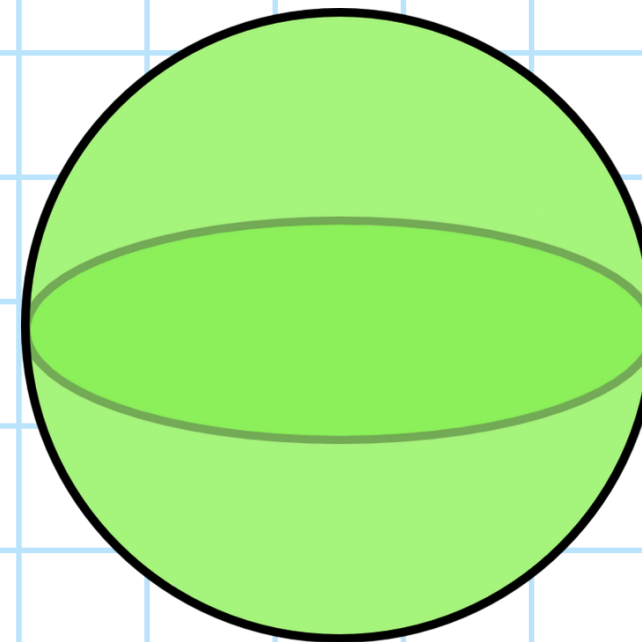

Kubus

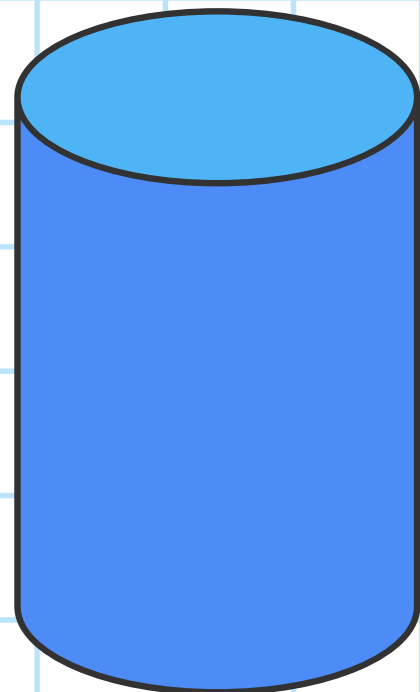

Balok

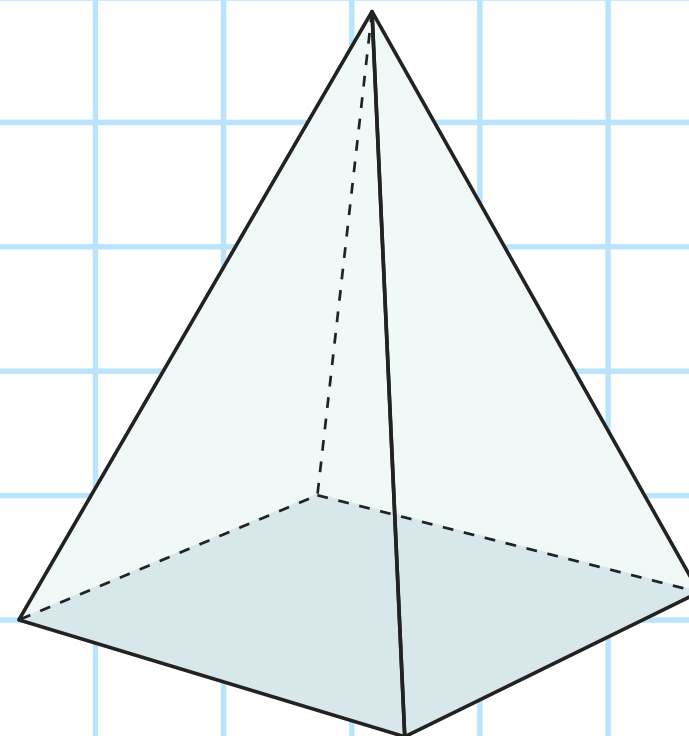

Bola

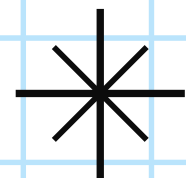

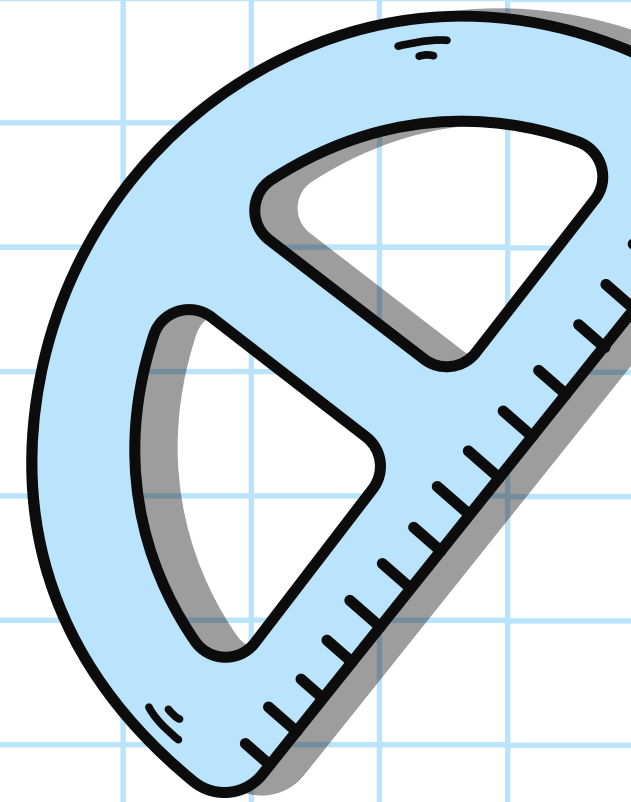

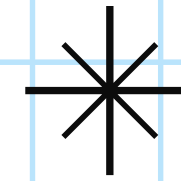

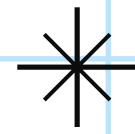

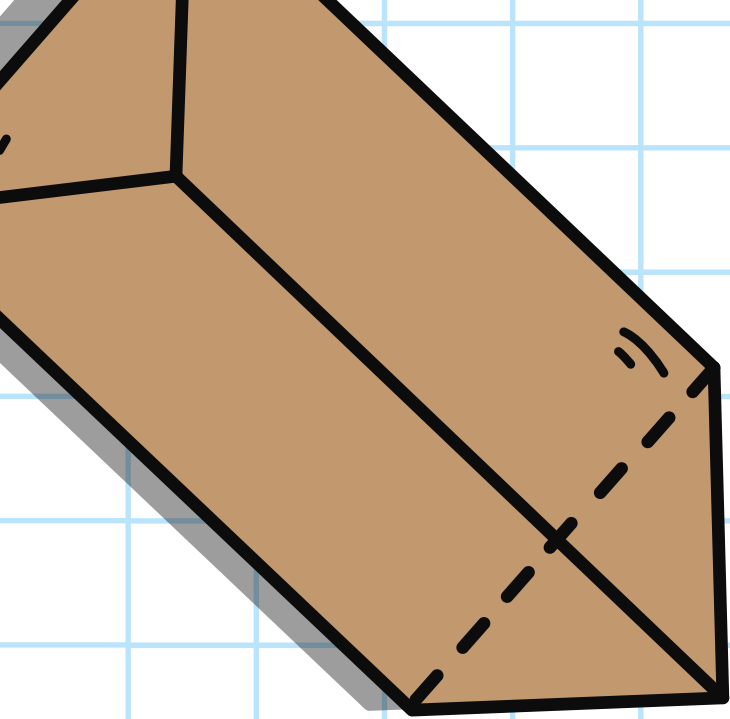

Tabung

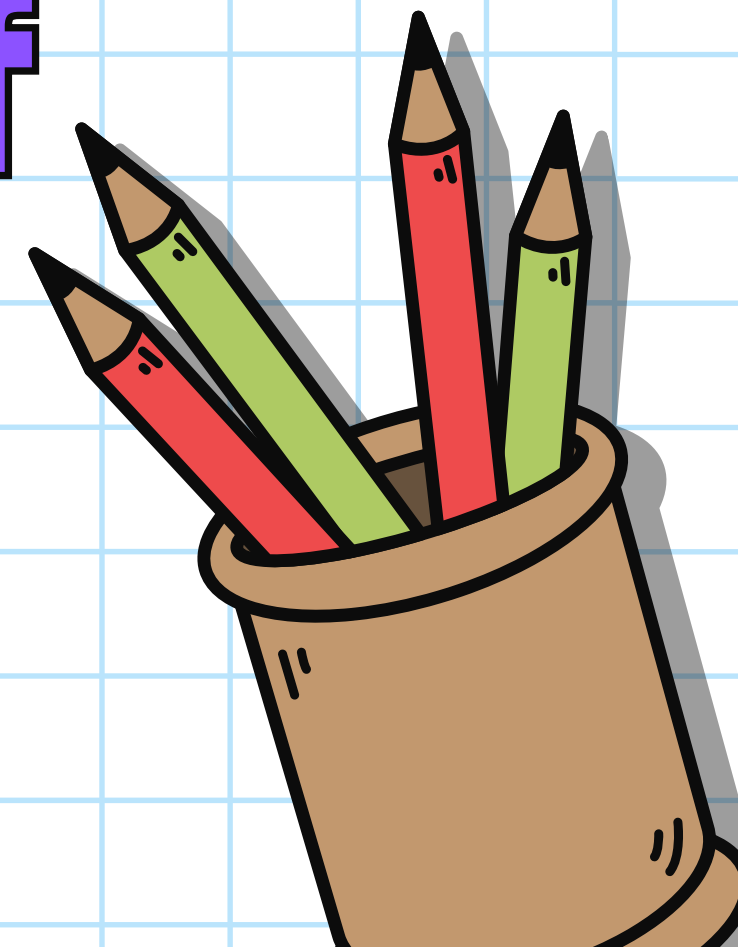

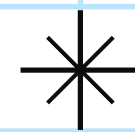

Limas

Perhitungan Bilangan Negatif

Perhitungan Bilangan Negatif

Bilangan negatif memiliki rumus khusus dalam perhitungan matematika.

Rumus:

- Bilangan positif (+) bertemu bilangan negatif (-), maka hasilnya bilangan negatif (-).
- Bilangan negatif (-) bertemu bilangan positif (+), maka hasilnya yaitu bilangan negatif (-).
- Bilangan negatif (-) bertemu bilangan negatif (-), maka hasilnya adalah bilangan positif (+).

Perhitungan Bilangan Negatif

Contoh:

- $20 + (-8) = 12$

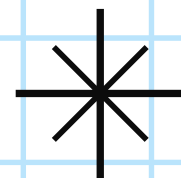

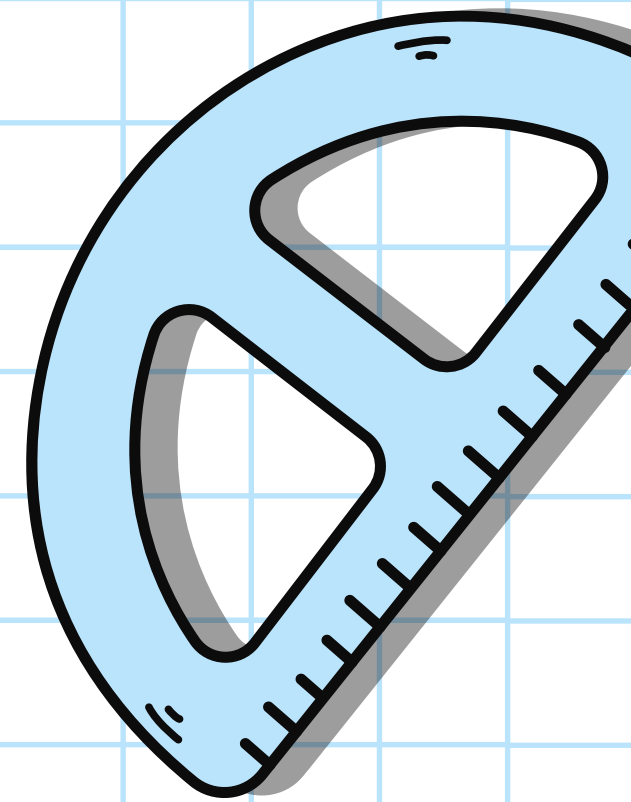

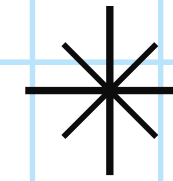

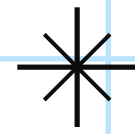

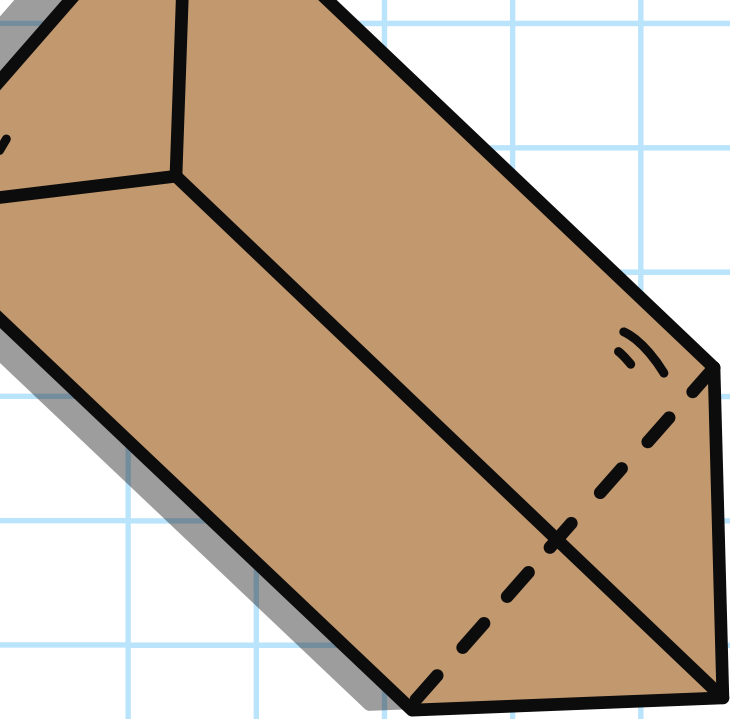

(+) bertemu dengan (-) menjadi (-)

$\Rightarrow 20 - 8 = 12$

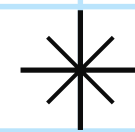

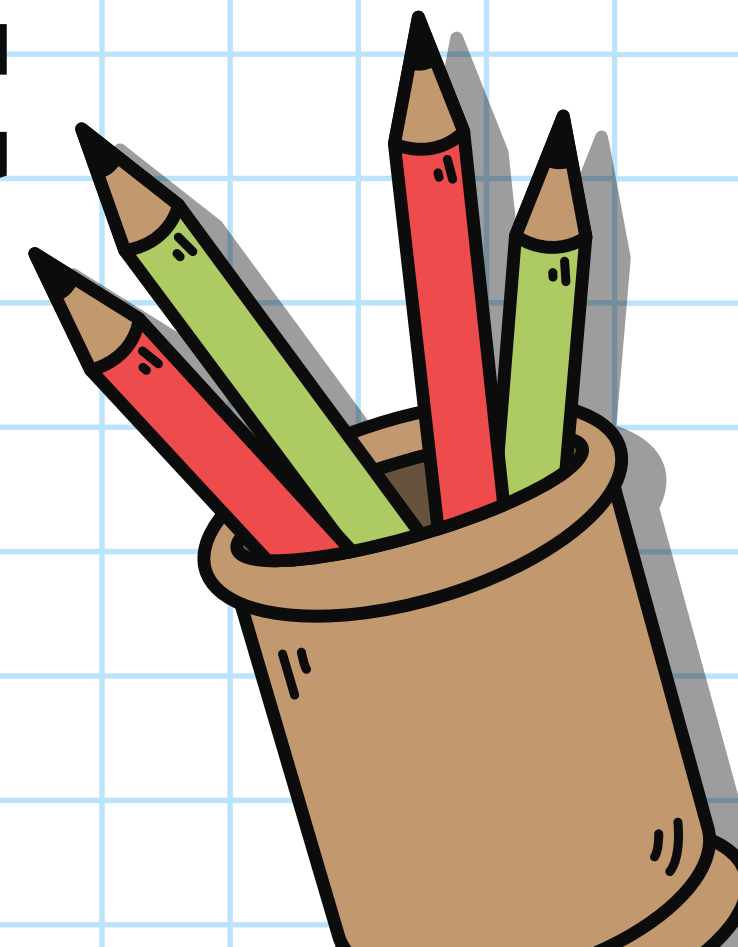

- $8 - (-6) = 14$

(-) bertemu dengan (-) menjadi (+)

$\Rightarrow 8 + 6 = 14$

Satuan Panjang & Berat

Satuan Panjang & Berat

Satuan Panjang (m)

Km

Hm

Dam

M

Dm

Cm

Mm

1 tangga
: 10

1 tangga
x 10

Km : Kilometer

Hm : Hektometer

Dam : Dekameter

M : Meter

Dm : Desimeter

Cm : Centimeter

Mm : Milimeter

Satuan Panjang & Berat

Satuan Berat (g)

Kg

Hg (ons)

Dag

g

Dg

Cg

Mg

1 tangga
: 10

1 tangga
x 10

Kg : Kilogram

Hg : Hektogram / ons

Dag : Dekagram

g : Gram

Dg : Desigram

Cg : Centigram

Mg : Miligram

* Satuan Panjang & Berat

Contoh:

- $5 \text{ km} = \dots \text{ m}$

- $12 \text{ Dam} = \dots \text{ dm}$

- $7 \text{ cm} = \dots \text{ Hm}$

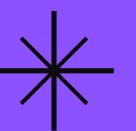

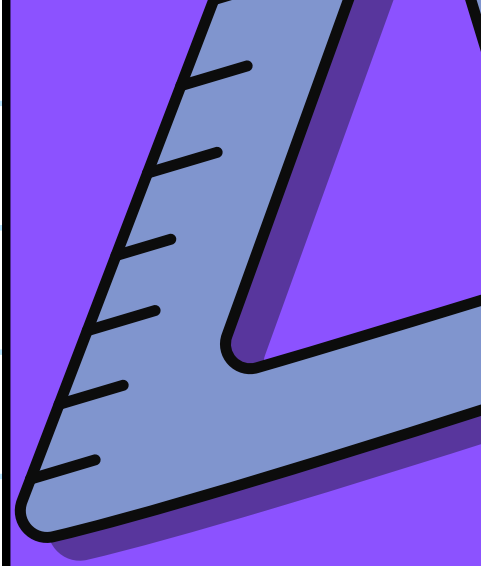

- * • $2 \text{ Mm} = \dots \text{ m}$

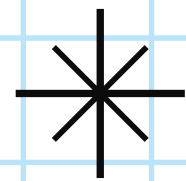

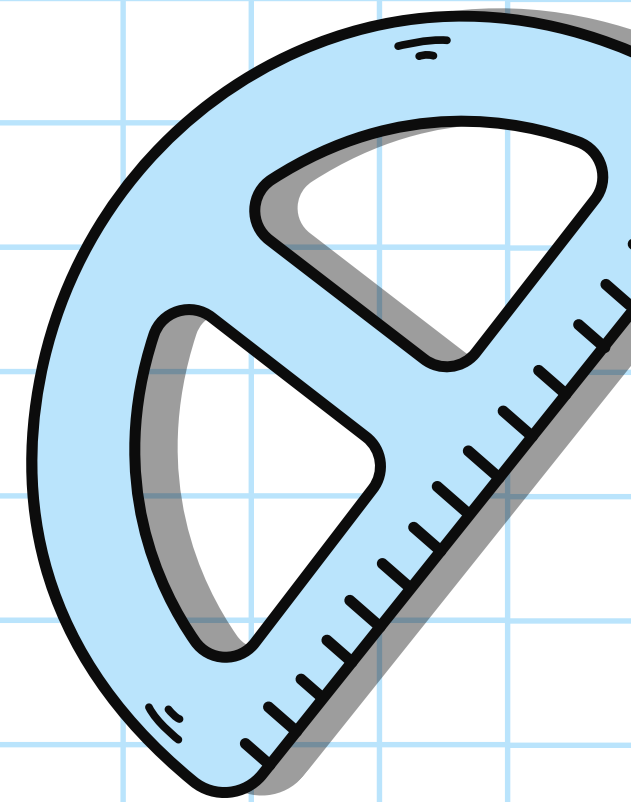

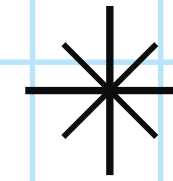

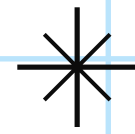

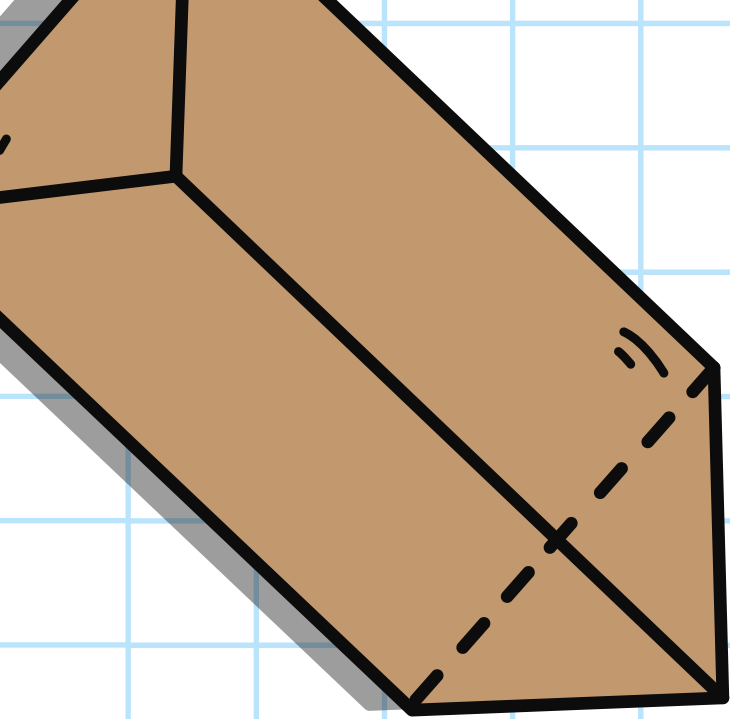

- $17 \text{ kg} = \dots \text{ Dag}$

- $5 \text{ ons} = \dots \text{ g}$

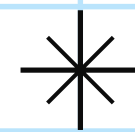

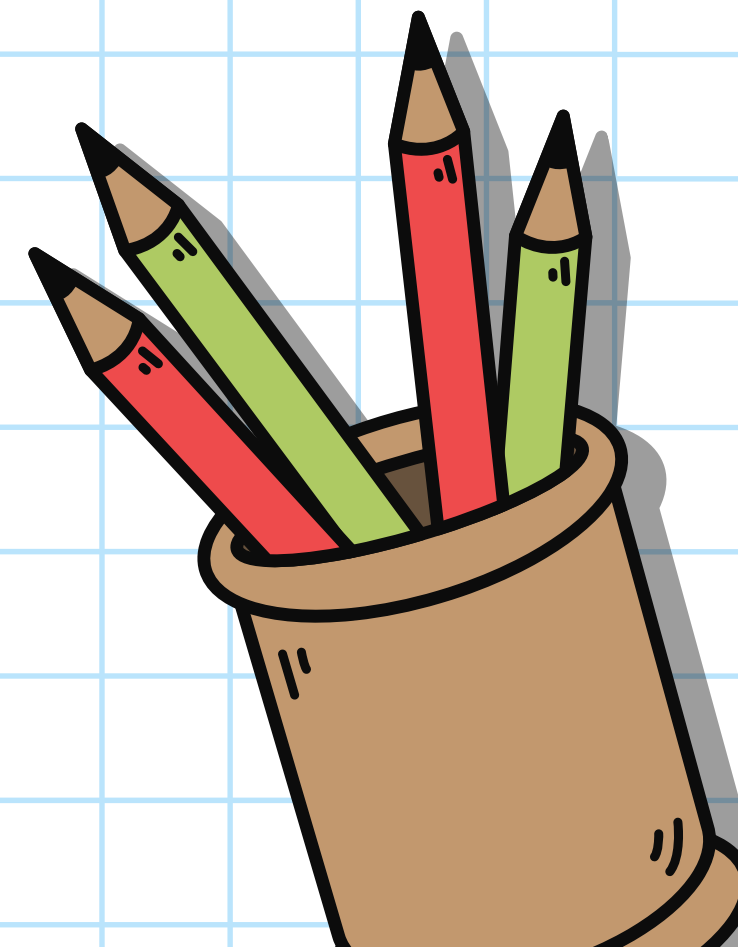

- $4 \text{ dg} = \dots \text{ kg}$

- $17 \text{ g} = \dots \text{ Mm}$

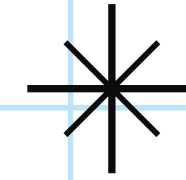

Satuan Waktu

* Satuan Waktu

- 1 menit = 60 detik
- 1 jam = 60 menit
- 1 jam = 3.600 detik ($60 \text{ menit} \times 60 \text{ detik}$)
- 1 hari = 24 jam
- 1 minggu = 7 hari
- 1 bulan = 30 hari
- 1 tahun = 12 bulan = 52 minggu
- 1 windu = 8 tahun
- 1 dasawarsa/dekade = 10 tahun
- 1 abad = 100 tahun
