

MATEMATIKA

Kelas 1 SD

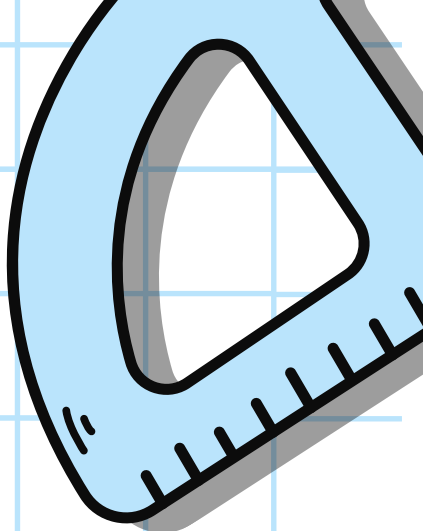

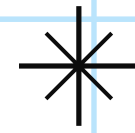

$$a^2 + b^2 = c^2$$

Satuan, Puluhan, Ratusan

Satuan, Puluhan, Ratusan

Nilai tempat merupakan nilai dari sebuah angka yang menunjukkan letaknya pada suatu bilangan.

- Bilangan **satuan** disusun oleh **satu** angka, antara: 0 – 9
- Bilangan **puluhan** disusun oleh **dua** angka, antara: 10 – 99
- Bilangan **Ratusan** disusun oleh **tiga** angka, antara: 100 – 999

Contoh:

214 adalah bilangan **ratusan** karena disusun oleh **tiga** angka.

(Urutan angka 2 adalah **ratusan**, angka 1 adalah **puluhan**, dan angka 4 adalah **satuan**)

2

1

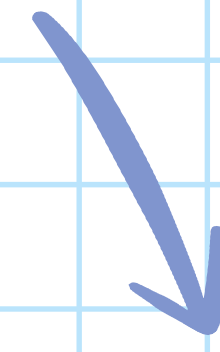

4

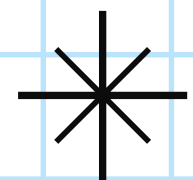

Satuan

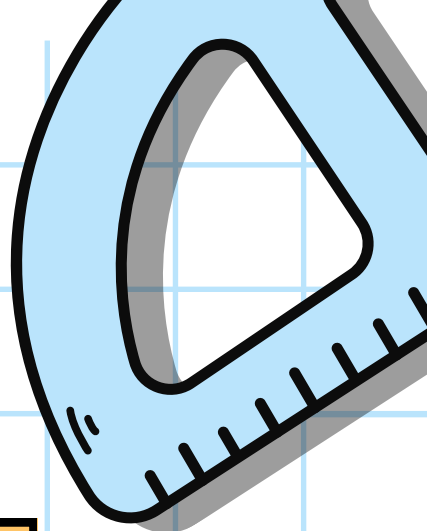

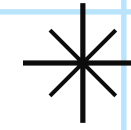

Ratusan

Puluhan

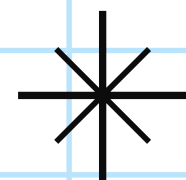

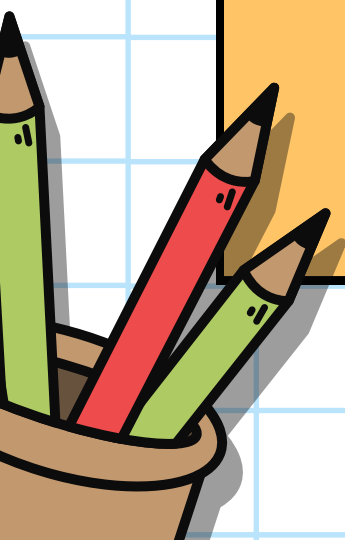

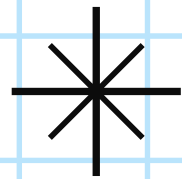

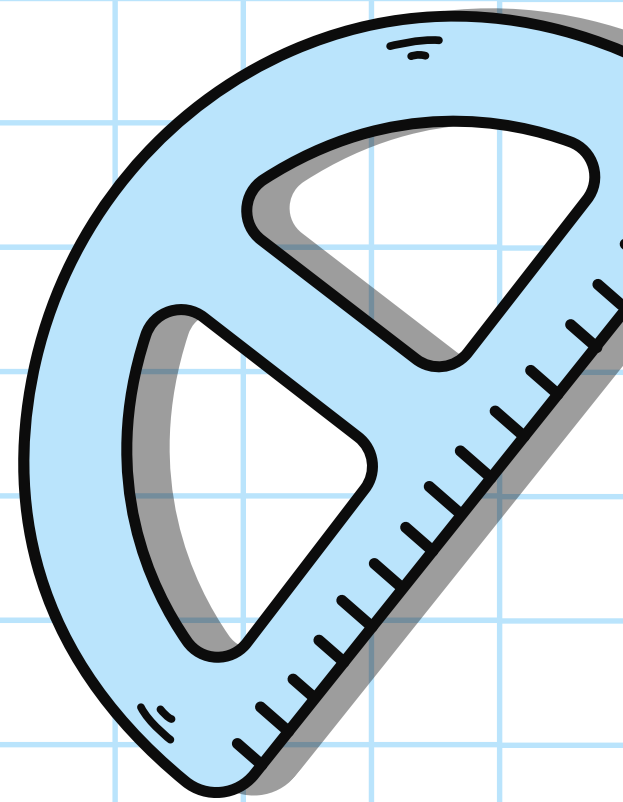

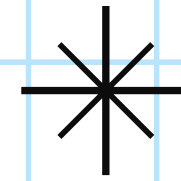

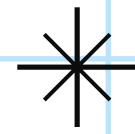

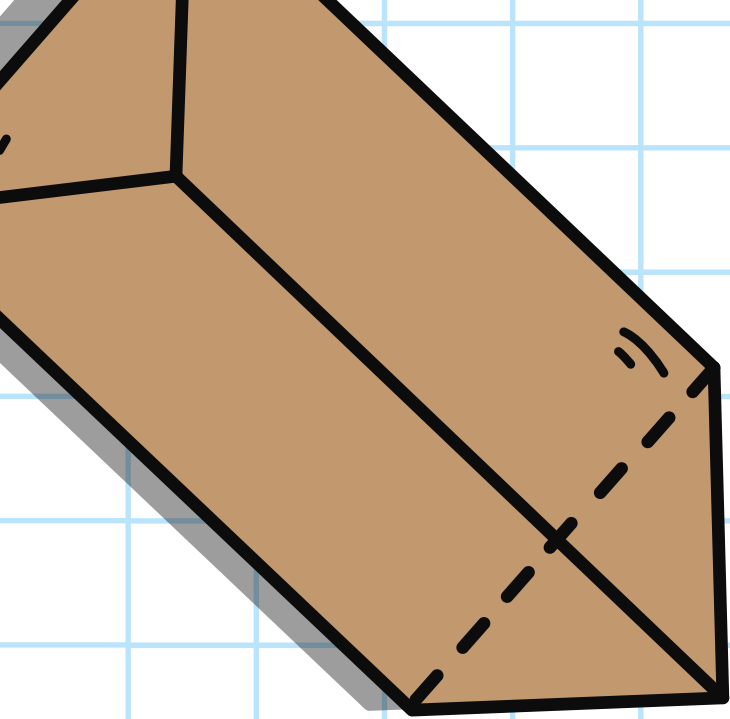

Satuan, Puluhan, Ratusan

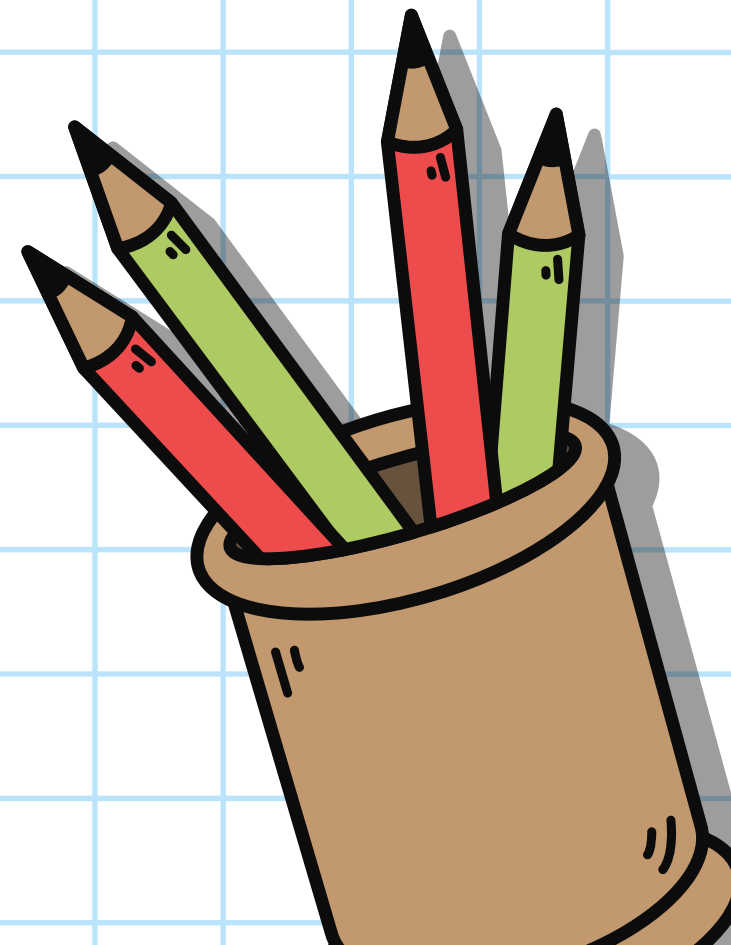

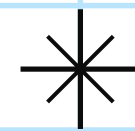

Latihan:

- 2 adalah bilangan...
- 7 adalah bilangan...
- 29 adalah bilangan...
- 89 adalah bilangan...
- 963 adalah bilangan...
- Angka 3 di **873** adalah nilai...
- Angka 7 di **741** adalah nilai...
- Angka 9 di **395** adalah nilai...
- **741** = ratusan + puluhan + satuan
- **299** = ratusan + puluhan + satuan

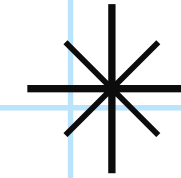

Perbandingan Nilai

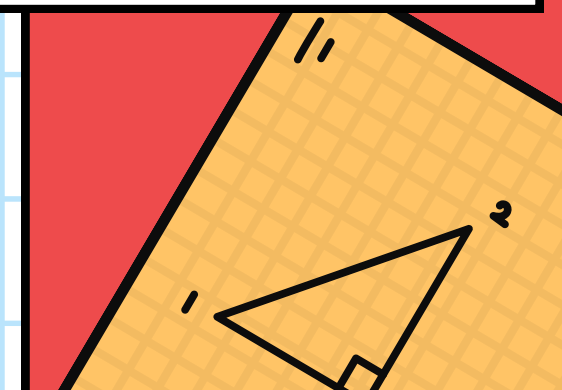

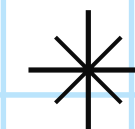

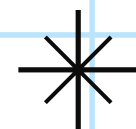

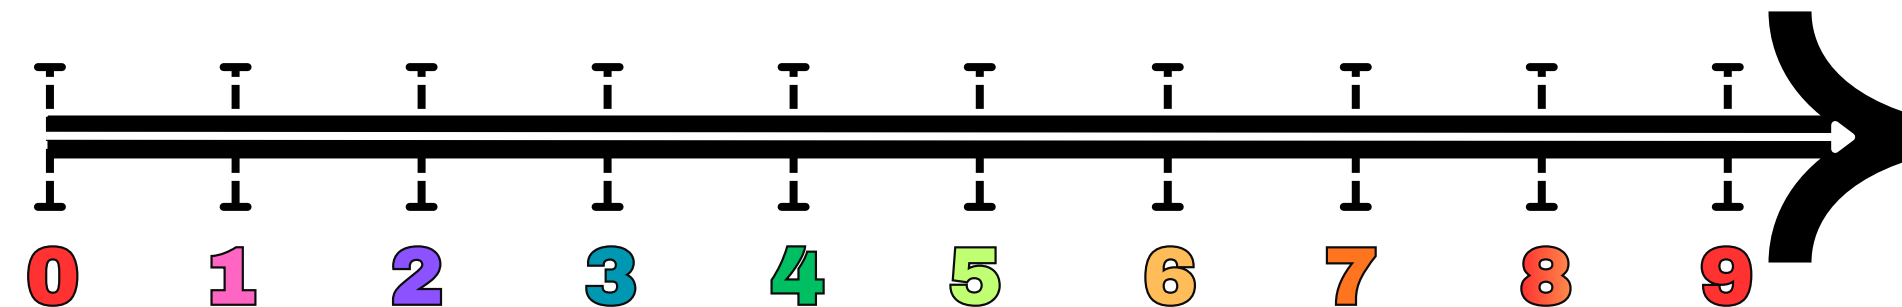

Perbandingan Nilai

Menggunakan garis bilangan untuk mengurutkan banyak benda.

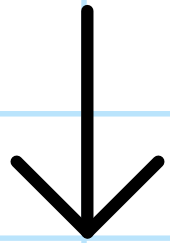

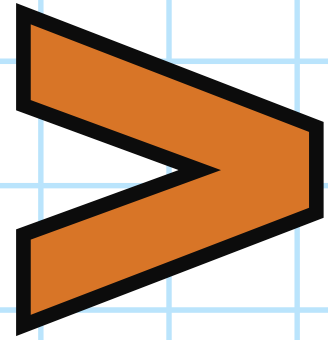

Angka di sisi **paling kiri** menandakan angka yang **paling kecil** nilainya. Semakin geser ke kanan angkanya juga semakin besar nilainya. Yang berarti, angka di sisi **paling kanan** menandakan angka yang **paling besar** nilainya

Perbandingan Nilai

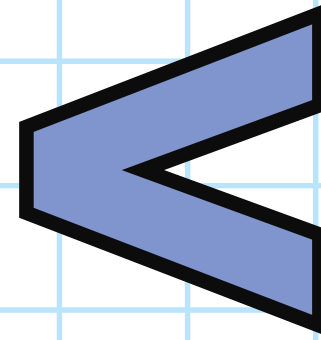

Tanda Perbandingan

Adalah tanda
Lebih Besar dari

$$7 > 4$$

7 lebih **besar** dari 4

Adalah tanda
Lebih Kecil dari

$$2 < 9$$

2 lebih **kecil** dari 9

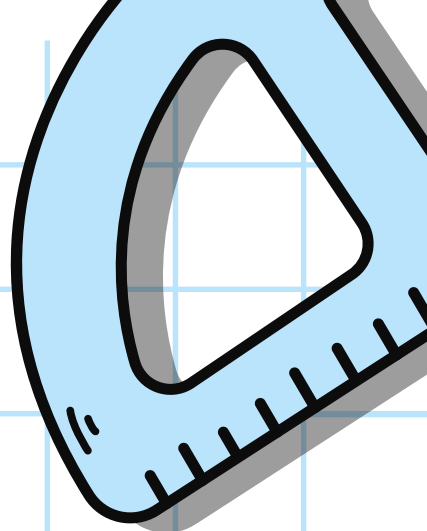

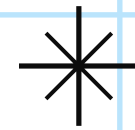

Adalah tanda
Sama Dengan

$$5 = 5$$

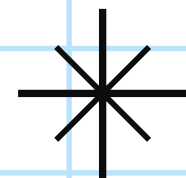

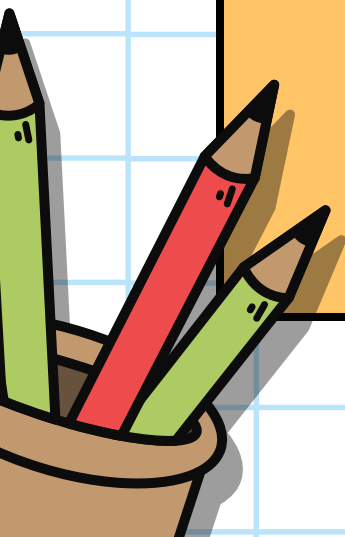

5 **sama** dengan 5

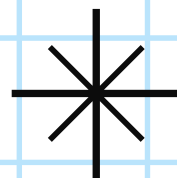

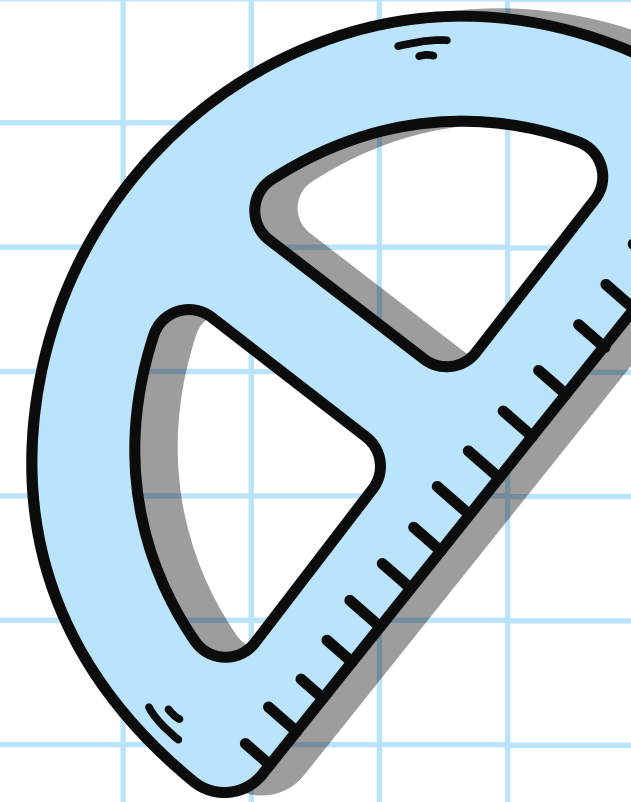

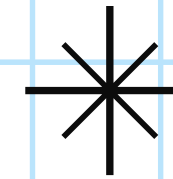

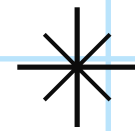

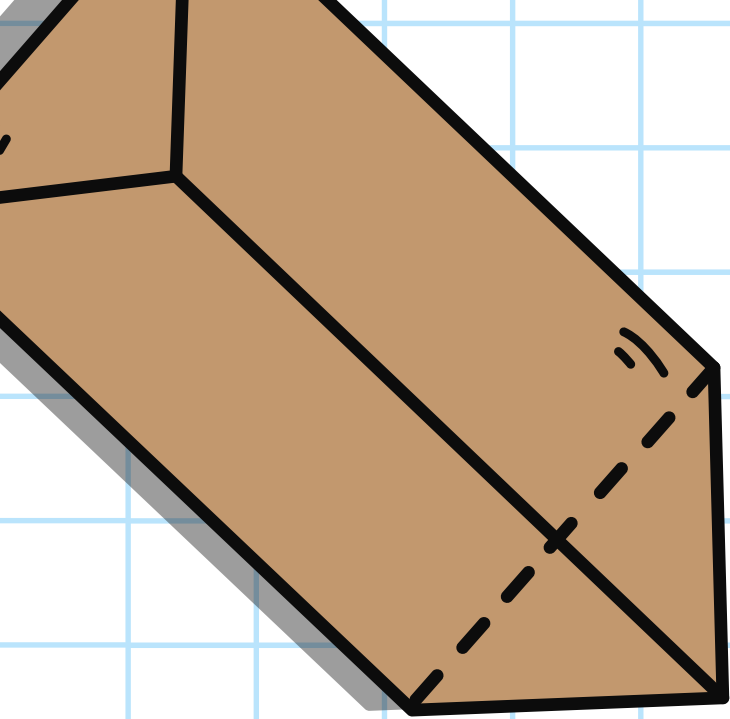

Perbandingan Nilai

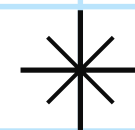

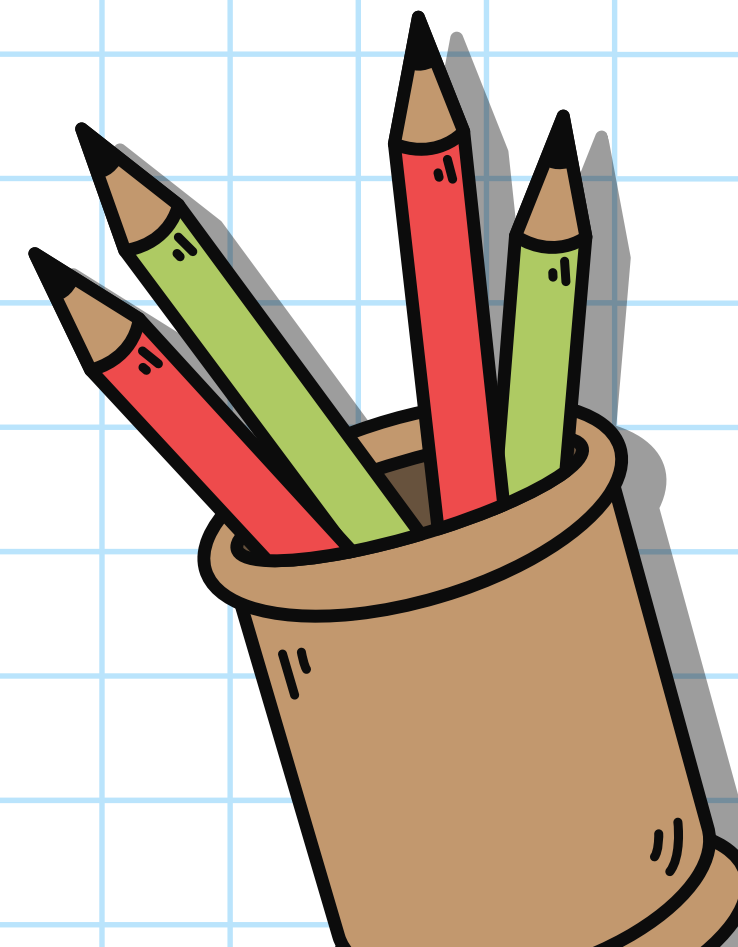

Latihan:

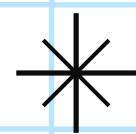

- 9 lebih besar dari
- 5 lebih kecil dari
- 12 lebih kecil dari
- 17 lebih besar dari
- 21 sama dengan
- 9 21
- 15 7
- 34 66
- 60 60
- 49 43

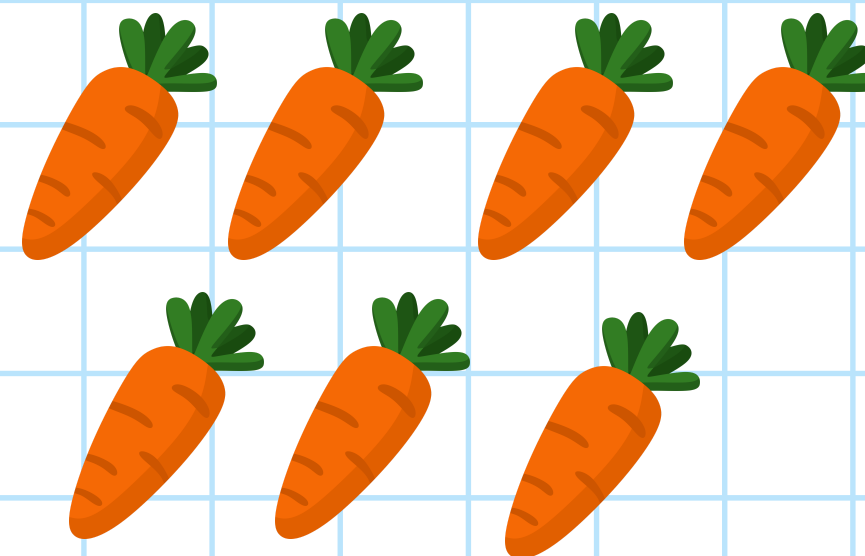

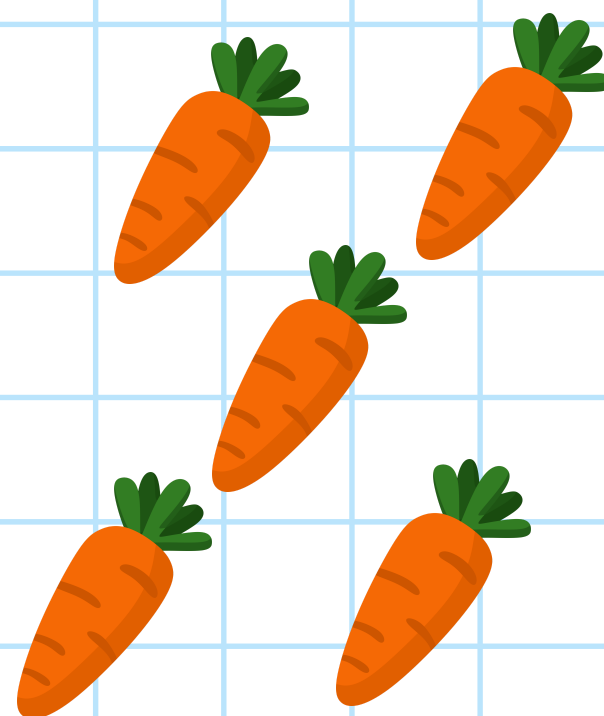

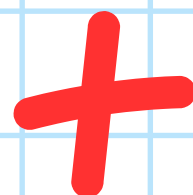

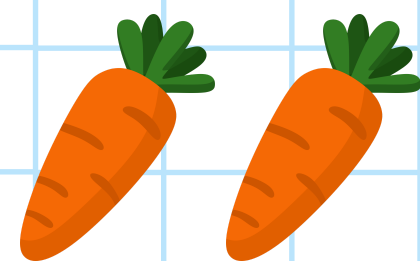

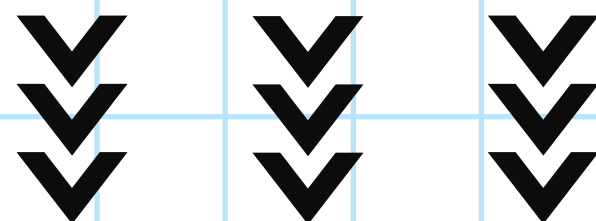

Penjumlahan

Contoh:

$$2 + 5 = 7$$

2 wortel

+

5 wortel

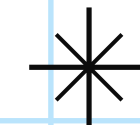

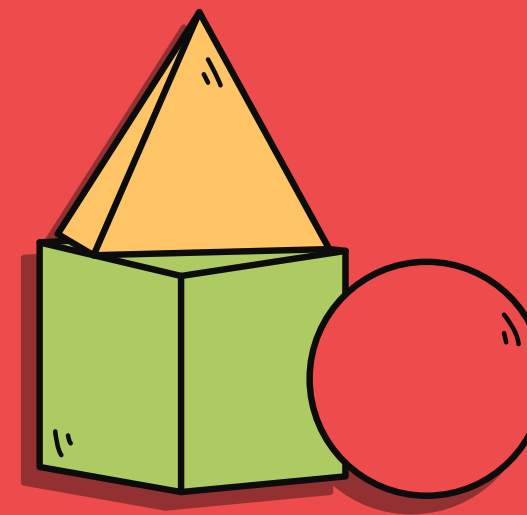

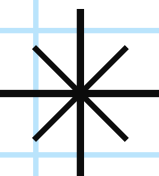

=

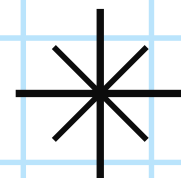

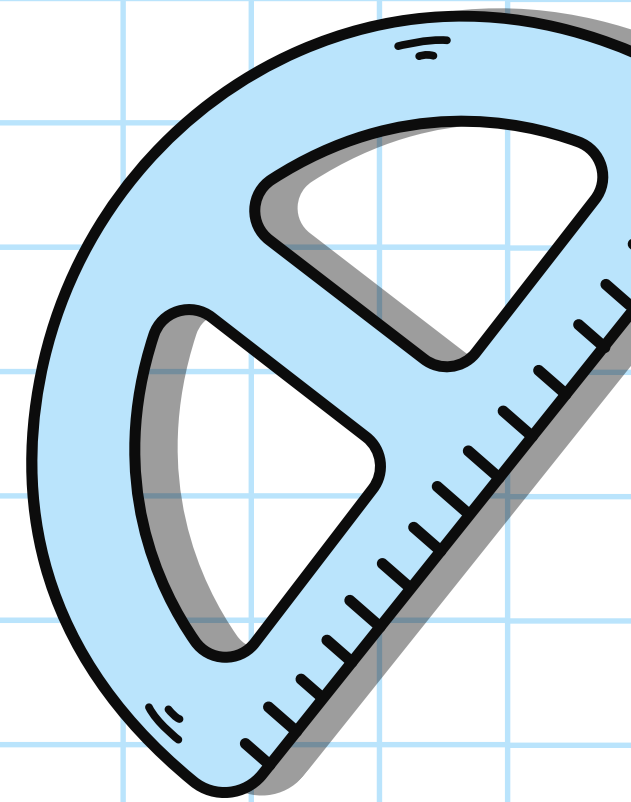

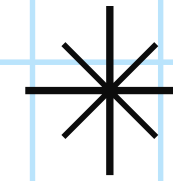

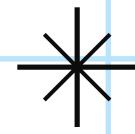

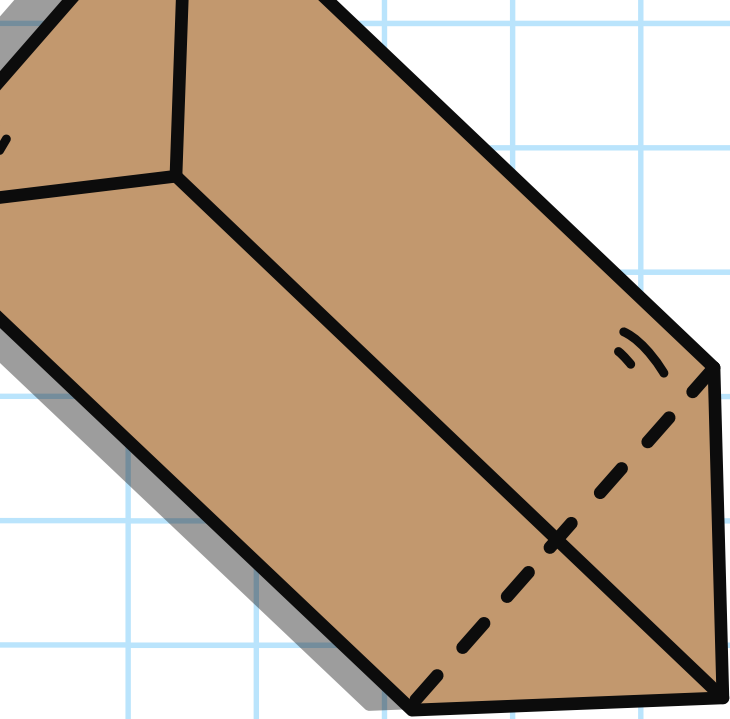

7 wortel

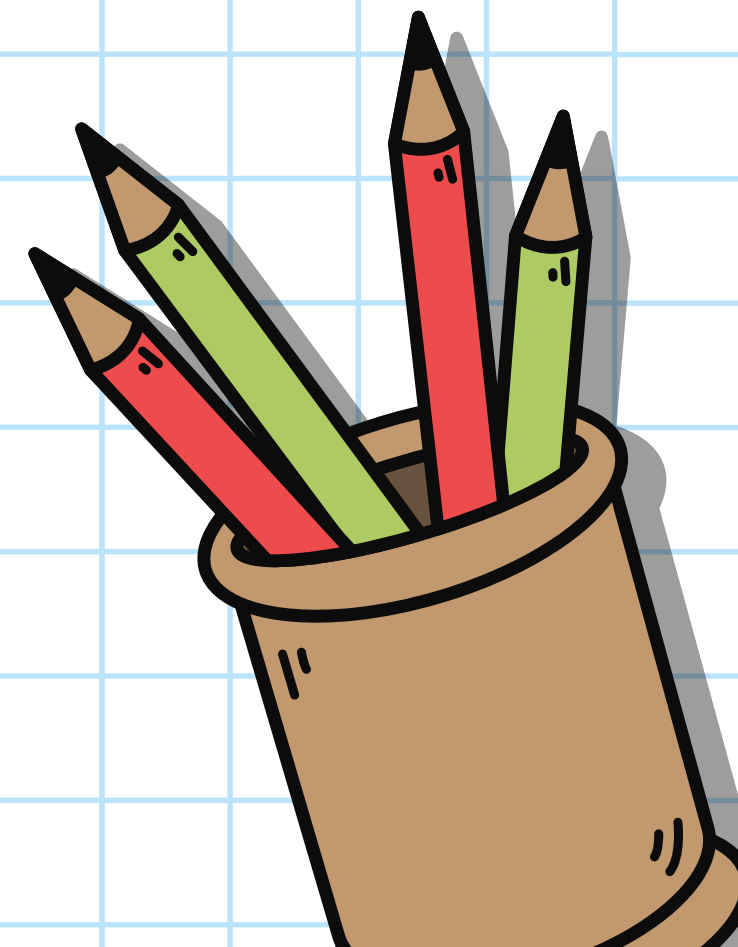

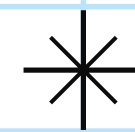

Penjumlahan

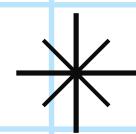

Penjumlahan adalah cara menggabungkan dua bilangan atau lebih untuk mendapatkan nilai yang lebih banyak/besar

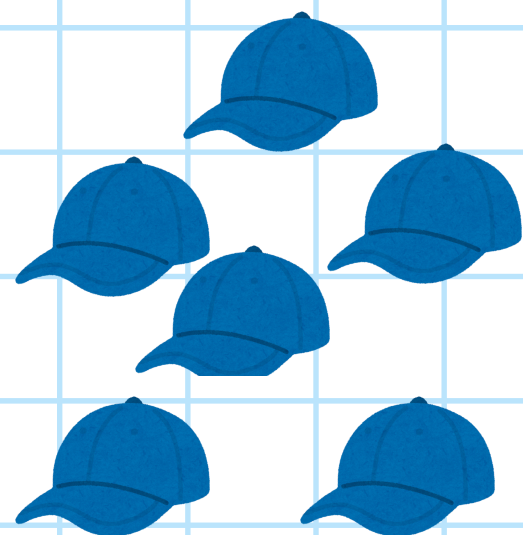

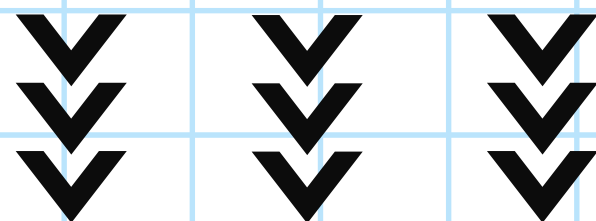

Pengurangan

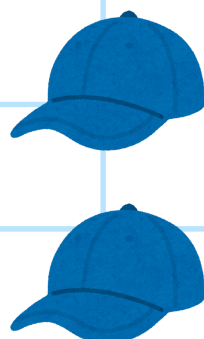

Contoh:

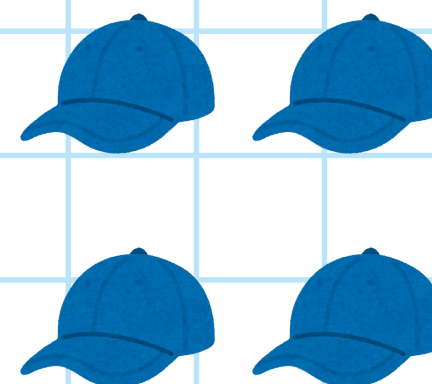

$$6 - 2 = 4$$

6 topi

2 topi

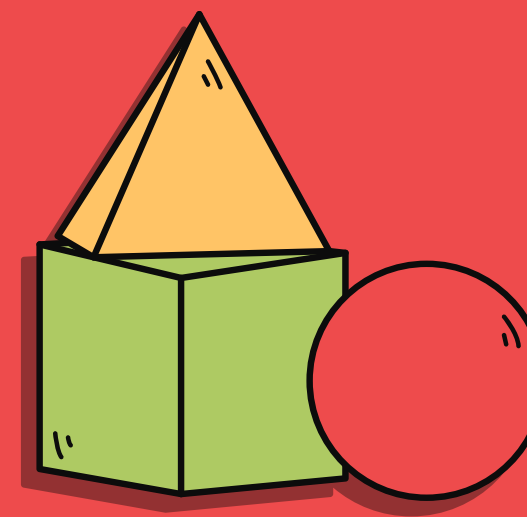

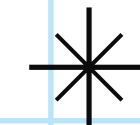

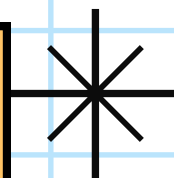

4 topi

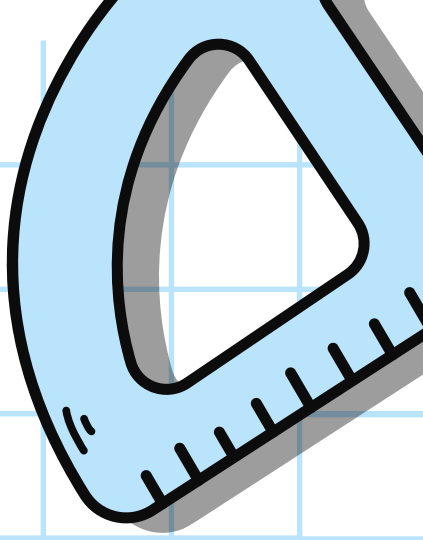

Pengurangan

Pengurangan adalah proses mengambil atau mengurangi suatu bilangan dari bilangan lain untuk mengetahui sisanya

Penjumlahan & Pengurangan

Latihan:

- $3 + 2 = \dots$

- $4 + 5 = \dots$

- $6 + 6 = \dots$

- $8 + 7 = \dots$

- $11 + 10 = \dots$

- $5 - 2 = \dots$

- $8 - 4 = \dots$

- $7 - 3 = \dots$

- $12 - 5 = \dots$

- $15 - 12 = \dots$
